

Three-bag nominal pseudo-conditioning ablation
source commit: 916b66168ba4cc5493cd9a7b04dae1d63b0b1ba1
manifest SHA256: d9cbe81a37d9e59c6de8a01c153a497e6c72f1a732fa1279f8e8270d487804f4
bags: single_rosbag_1, single_rosbag_2, single_rosbag_succeeded
cases: 17

Spreads are RMS distances about the three-bag mean. J/m uses the Frobenius matrix norm; CoG and f/m use Euclidean vector norms. Cross-evaluation is intentionally a separate secondary phase.

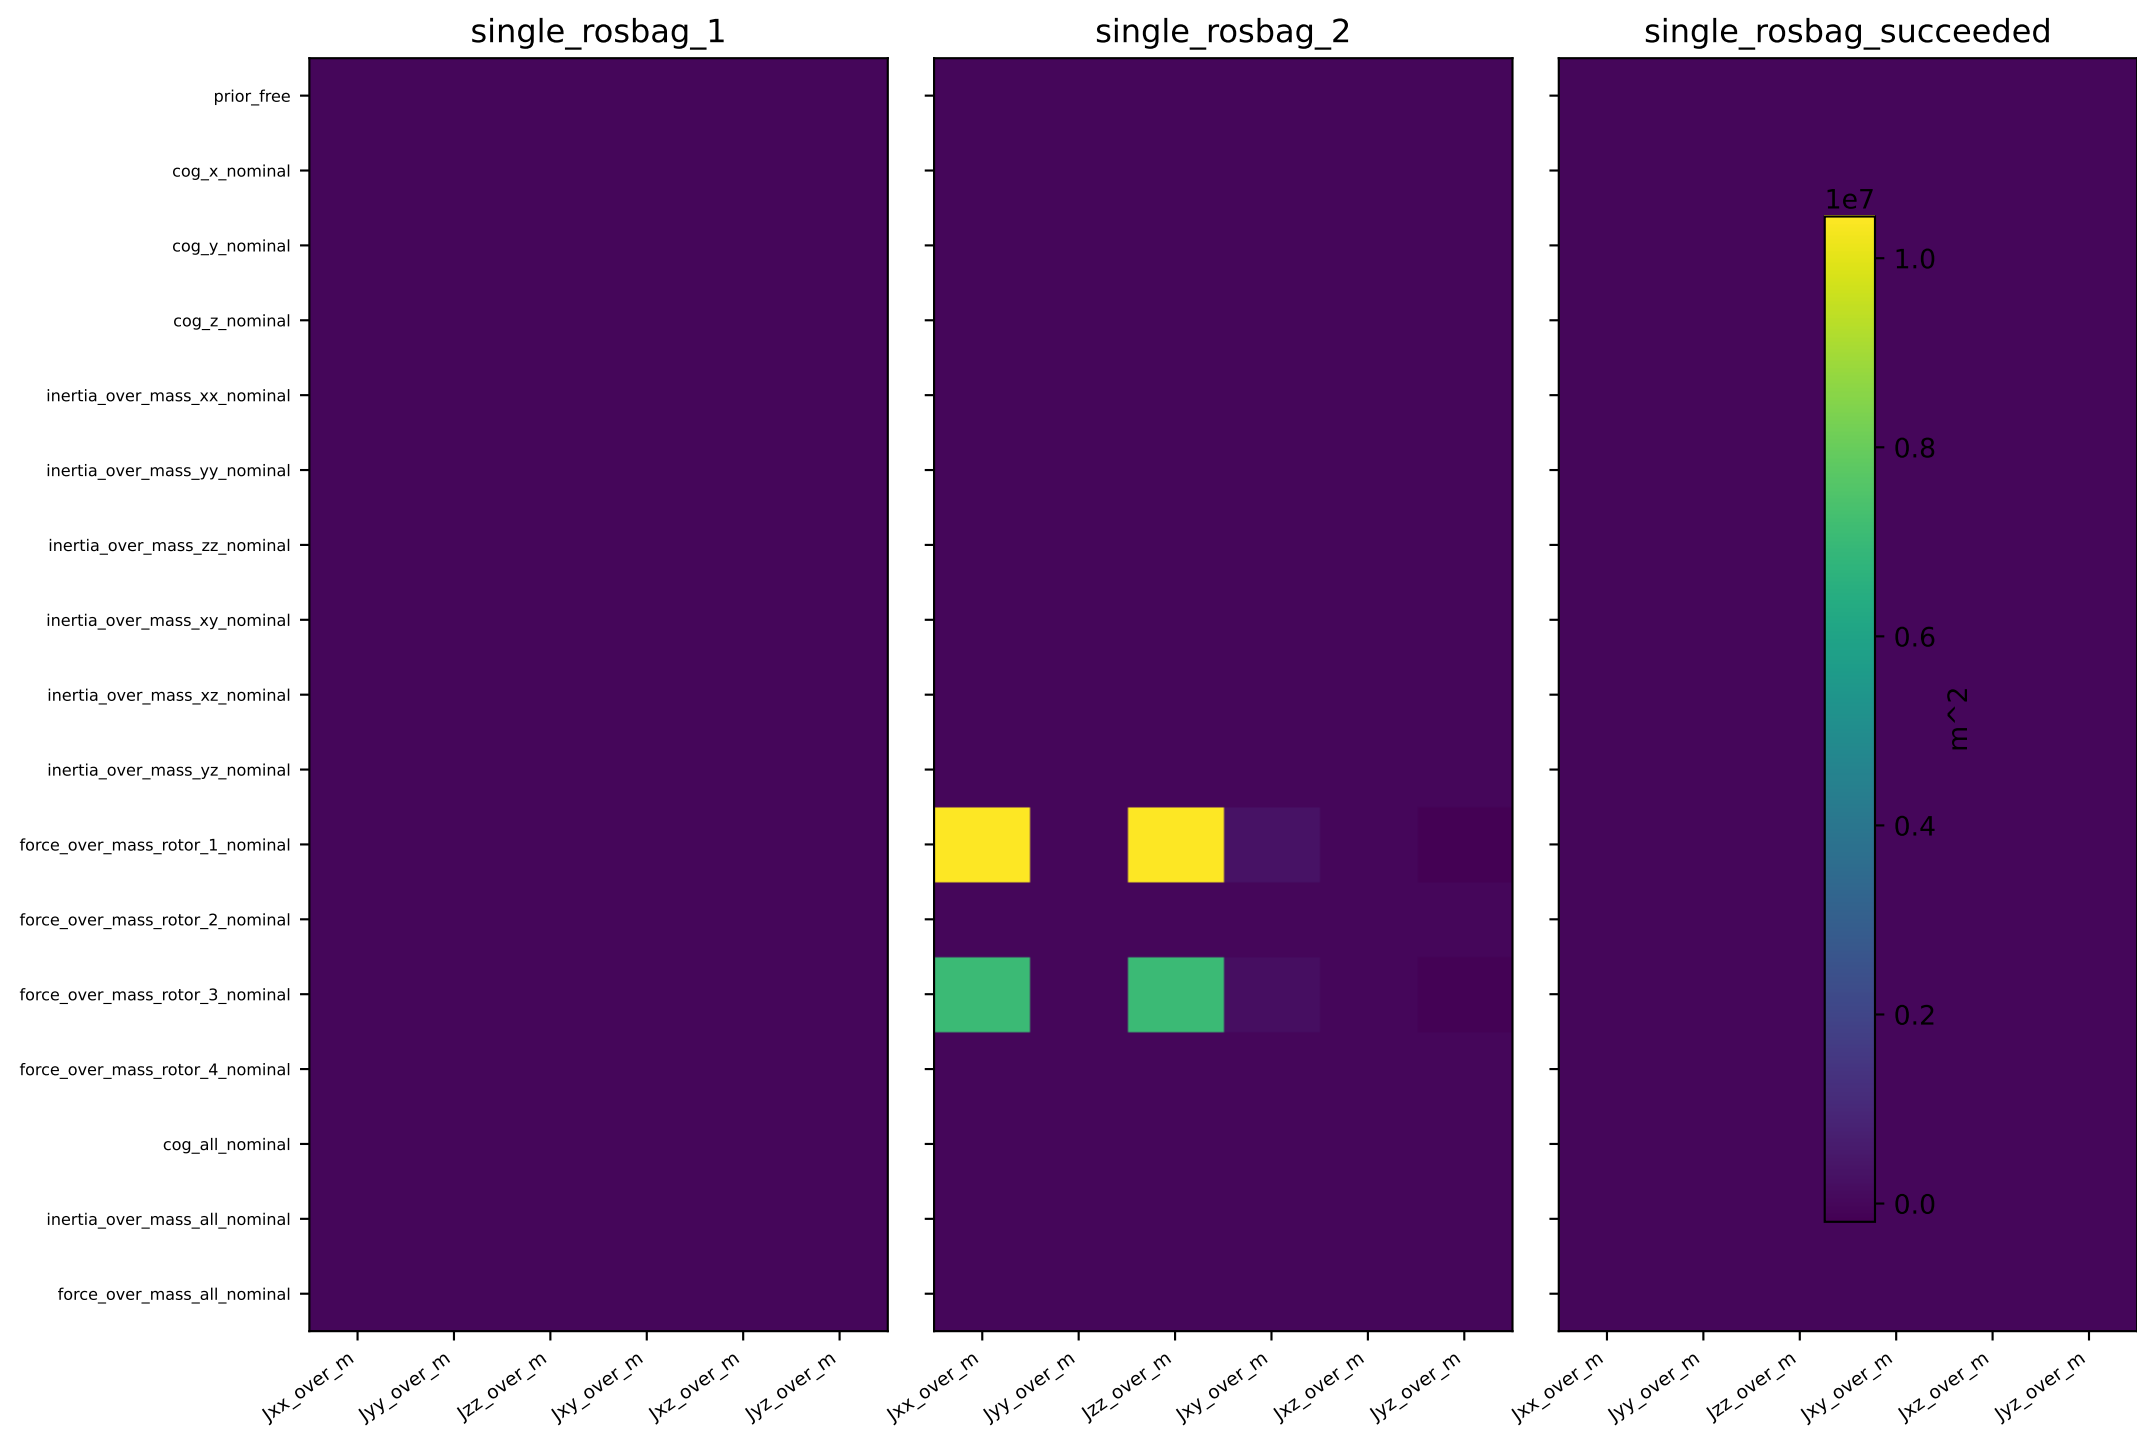

Data-fit price and cross-bag point spreads

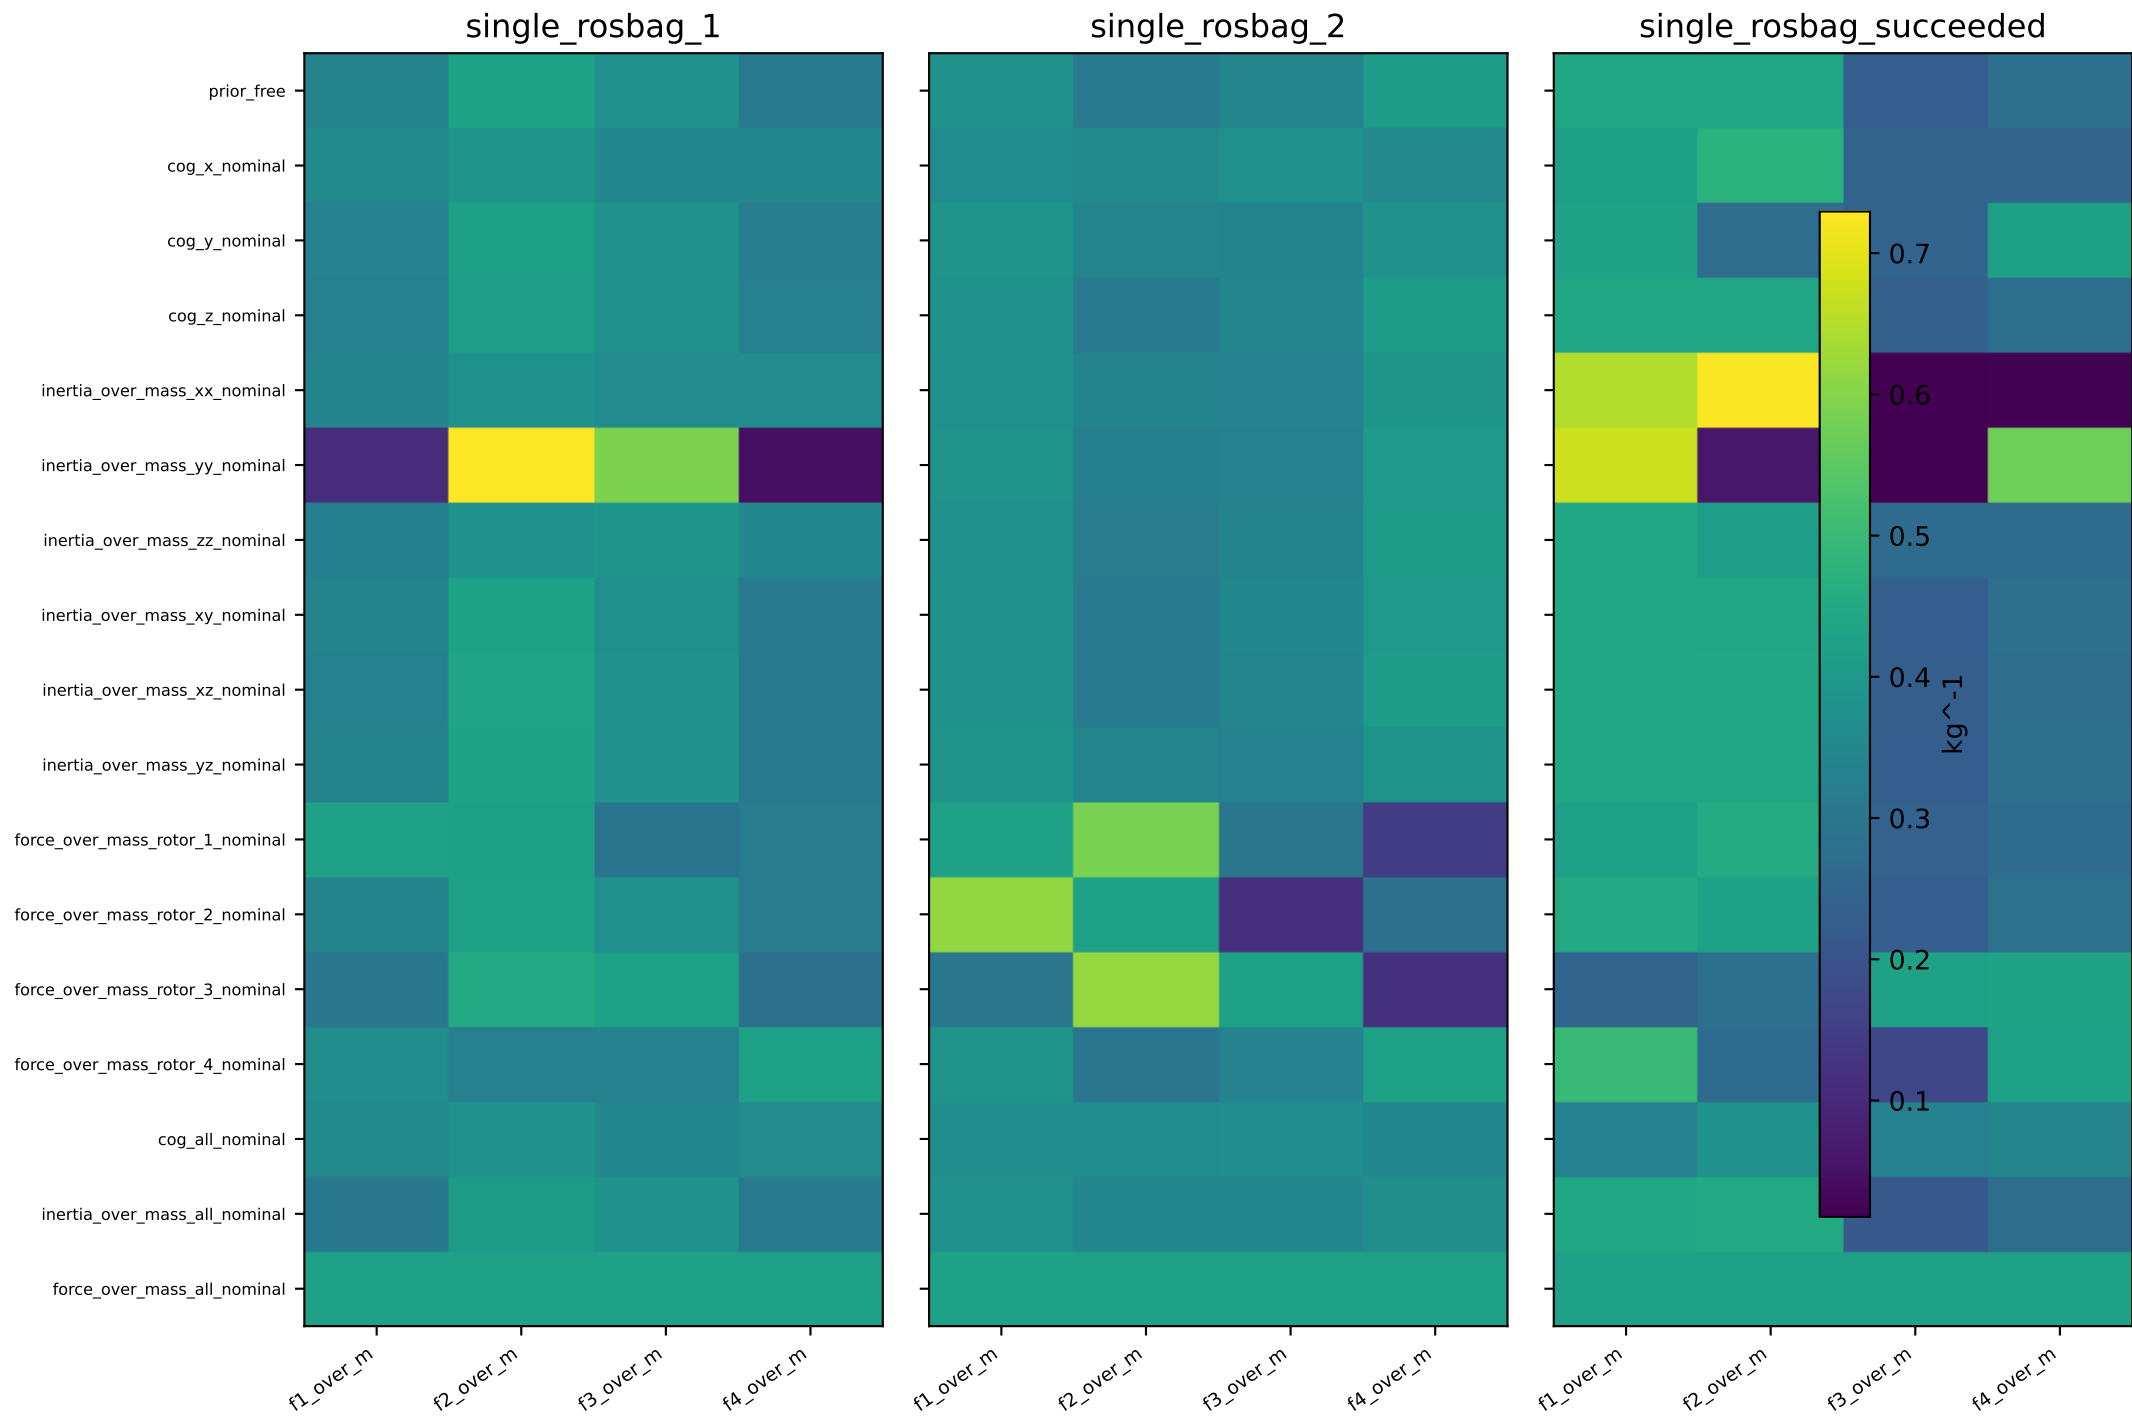

CoG (actual point estimates)

Inertia over mass (actual point estimates)

Force effectiveness over mass (actual point estimates)

All pairwise cross-bag physical distances
