
2 Hz / angular-rate sigma 2 deg/s per reading
Mocap-refined model; held-out prediction; gyroscopic term retained
Held-out mocap reference (initial pose only)
Nominal-start nonlinear Euler
Refined nonlinear Euler
Roll [deg]
Pitch [deg]
Yaw [deg]
Time from common initialization [s]
Euler center f(E[R]) and local +/-2sigma are display approximations; model parameters and past torque mean are fixed.

2 Hz / sigma 2 deg/s: conditional widths and held-out mocap error
Refined nonlinear Euler
Nominal-start nonlinear Euler
Roll 2sigma [deg]
Pitch 2sigma [deg]
Yaw 2sigma [deg]
SO(3) error [deg]
Time [s]
