
Synthetic smooth rotation / gyro 2 Hz / sigma 1 deg/s per reading
Same known torque; linear angular dynamics omit only omega x J omega
Roll [deg]
Pitch [deg]
Yaw [deg]
Time [s]
Synthetic truth
Linear angular dynamics
Nonlinear Euler
Shading: local +/-2sigma Euler moment proxy; no Gaussian coverage guarantee. Gray lines: gyro acquisitions.

2 Hz / sigma 1 deg/s: propagated widths and synthetic-truth error
Linear angular dynamics
Nonlinear Euler
Roll 2sigma [deg]
Pitch 2sigma [deg]
Yaw 2sigma [deg]
SO(3) error [deg]
Time [s]
