Roll / Pitch PID gains: success and failure
Failure 1 posterior · I = 1
Failure 2 posterior · I = 1
Success
(13, 1, 20)
Failure
(20, 1, 8)
Failure
(10, 1, 8)
D gain
P gain

10
15
20
25
Success region (survival ≥ 95%)
Failure region (survival < 95%)
Each case uses its own posterior; other controller gains are fixed at the successful-flight values.
