Tip load experiment: prediction, tracking, and estimation

zero_pose
shoulder_bend
elbow_bend
load_added
load_removed

Tip position error [mm]
Predicted tip vs plant
Reference tip vs plant

Joint RMS error [deg]
Prediction vs plant
Reference vs plant
Prediction criterion

Tip orientation error [deg]
Predicted orientation vs plant
Reference orientation vs plant

Log-K difference
max |log(K_exec / K_est)|
Estimator batch log-K step

Load / gate
Tip load [kg equivalent]
Timing gate ready

Time from scenario start [s]
