All PID gains: Success is in the green region on every axis

Failure 1

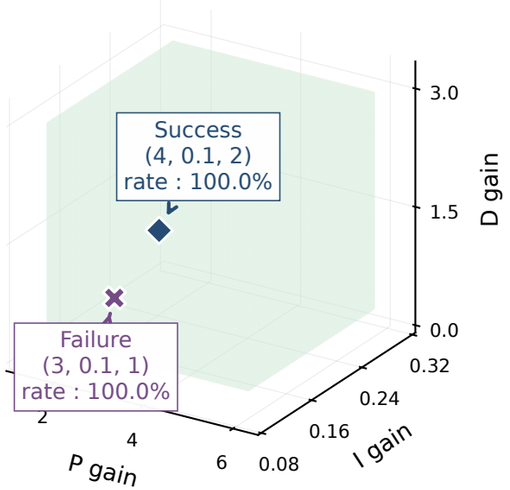

Roll / Pitch
Success: green

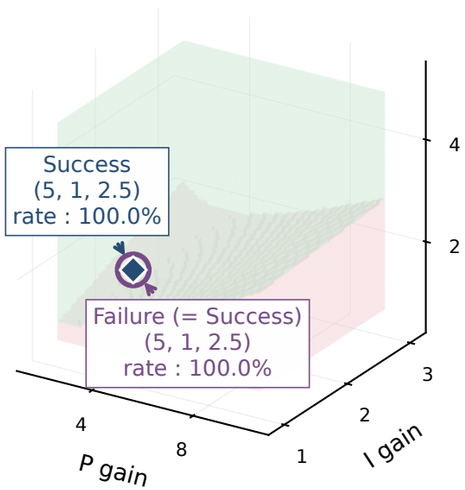

Yaw
Success: green

XY
Success: green

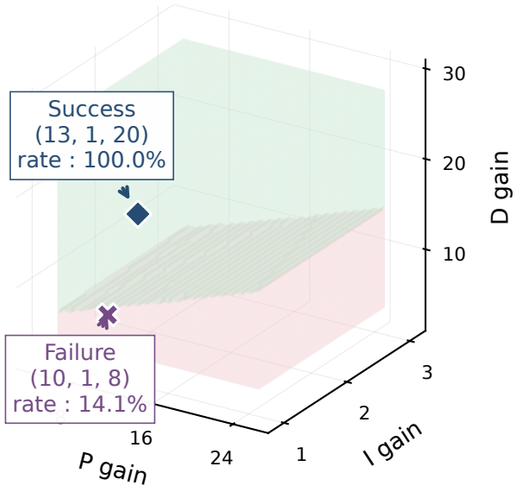

Z
Success: green

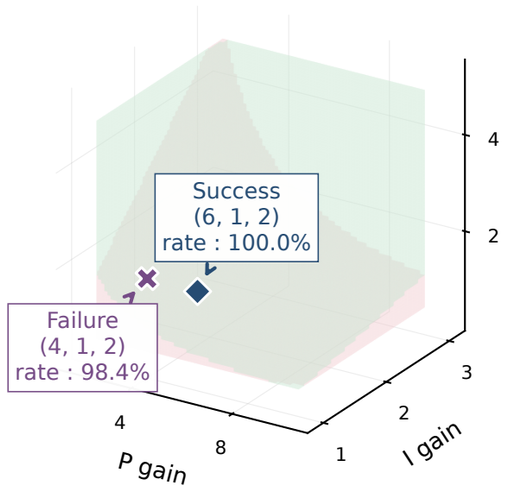

Failure 2

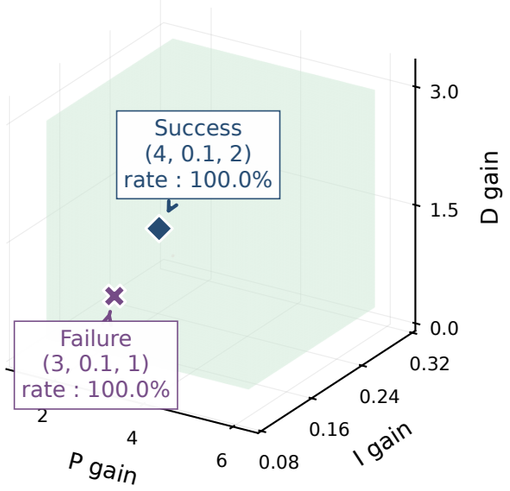

Roll / Pitch
Success: green

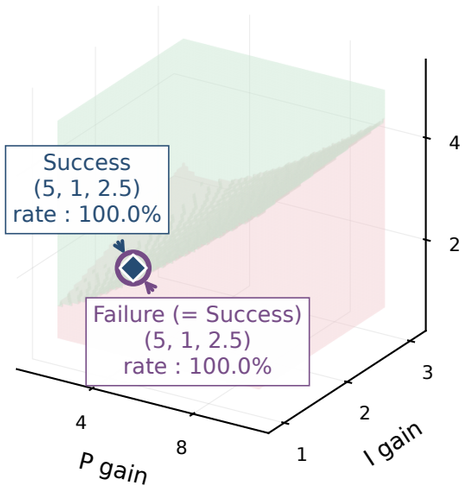

Yaw
Success: green

XY
Success: green

Z
Success: green

Green region: survival ≥ 95% Red region: survival < 95%

3D volumes are cut at each shared reference I to show both points. Purple marks identify the failure-flight gains; Z gains coincide.

Each case uses its own posterior. Other controller gains are fixed at the successful-flight values.
