
success — Residual wrench at native measurement timestamps
Fx [N]
Fy [N]
Fz [N]
Tx [N m]
Ty [N m]
Tz [N m]
time since first native IMU sample [s]

success — Residual wrench spectrum (linear detrend; native irregular clock)
Fx normalized power
Fy normalized power
Fz normalized power
Tx normalized power
Ty normalized power
Tz normalized power
frequency [Hz]

success — Applied residual wrench in reconstructed dynamics (body frame, about CoG)
Fx [N]
Fy [N]
Fz [N]
Tx [N m]
Ty [N m]
Tz [N m]
applied law ±2σ
added residual-wrench mean
time since first native IMU sample [s]
The native-IMU residual wrench is added to the dynamics; this is not a model-only free replay.
