

Analytical full-state stability assessment; no numerical poles were computed.
This is not a flight-failure probability. Pending nodes remain blank.
3D display cut at the recorded I; all computed data retained.

Analytical full-state stability assessment; no numerical poles were computed.
This is not a flight-failure probability. Pending nodes remain blank.
3D display cut at the recorded I; all computed data retained.

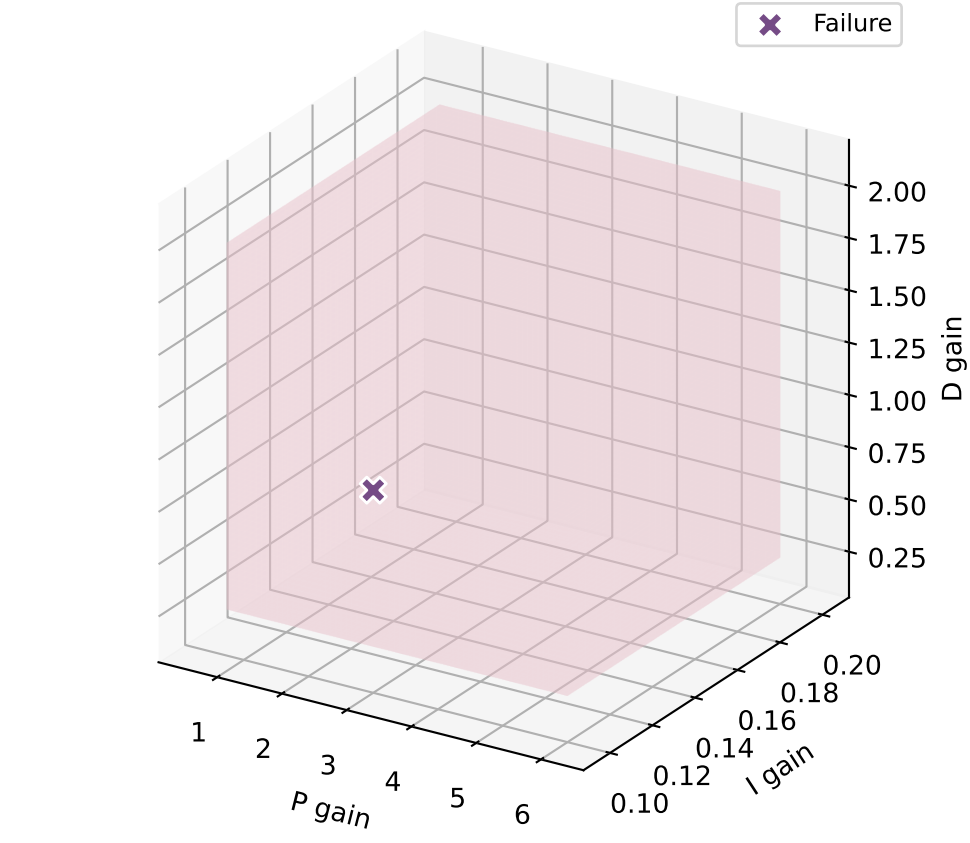

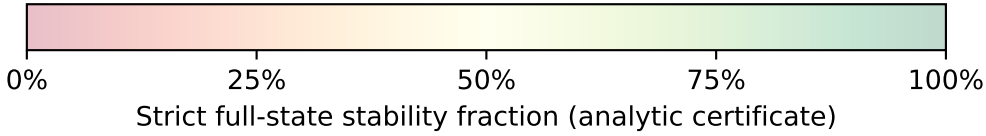

Analytical full-state stability assessment; no numerical poles were computed.
This is not a flight-failure probability. Pending nodes remain blank.
3D display cut at the recorded I; all computed data retained.

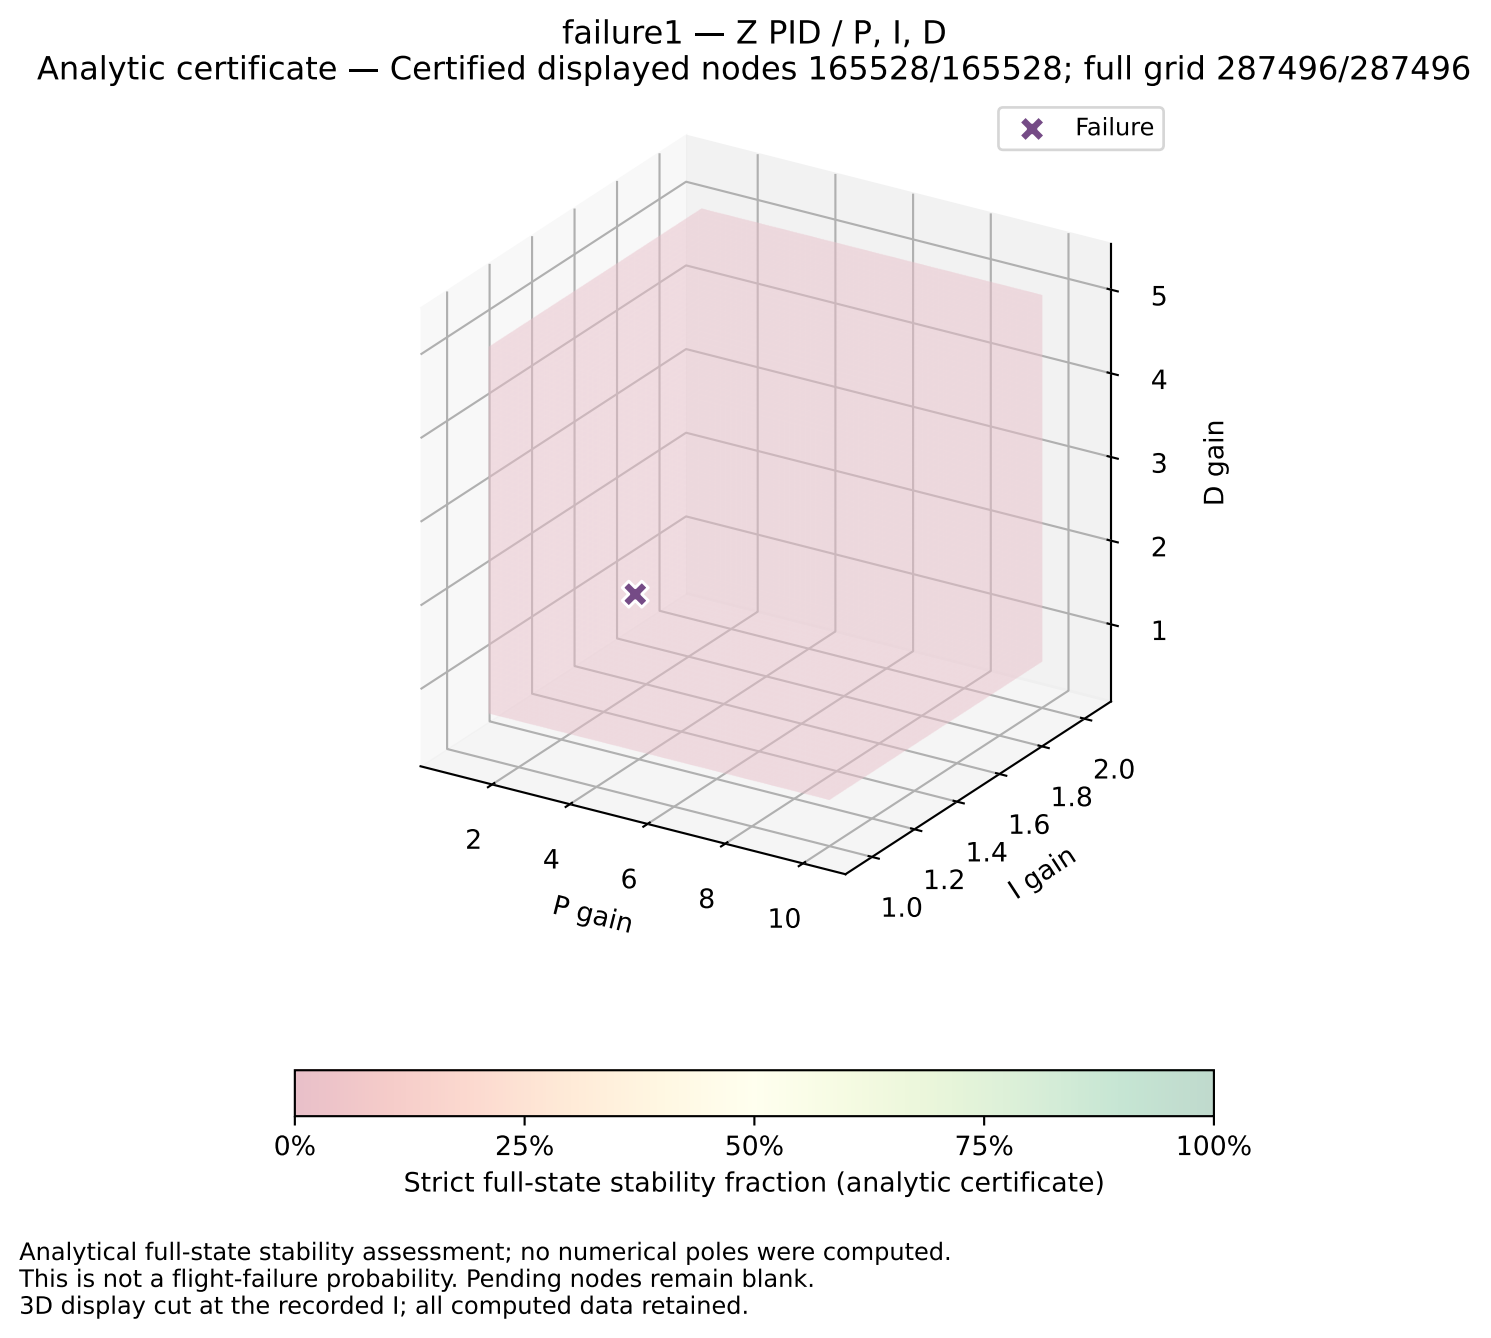

Analytical full-state stability assessment; no numerical poles were computed.
This is not a flight-failure probability. Pending nodes remain blank.
3D display cut at the recorded I; all computed data retained.

failure1 — XY PID / P, I, D
Analytic certificate — Certified displayed nodes 165528/165528; full grid 287496/287496

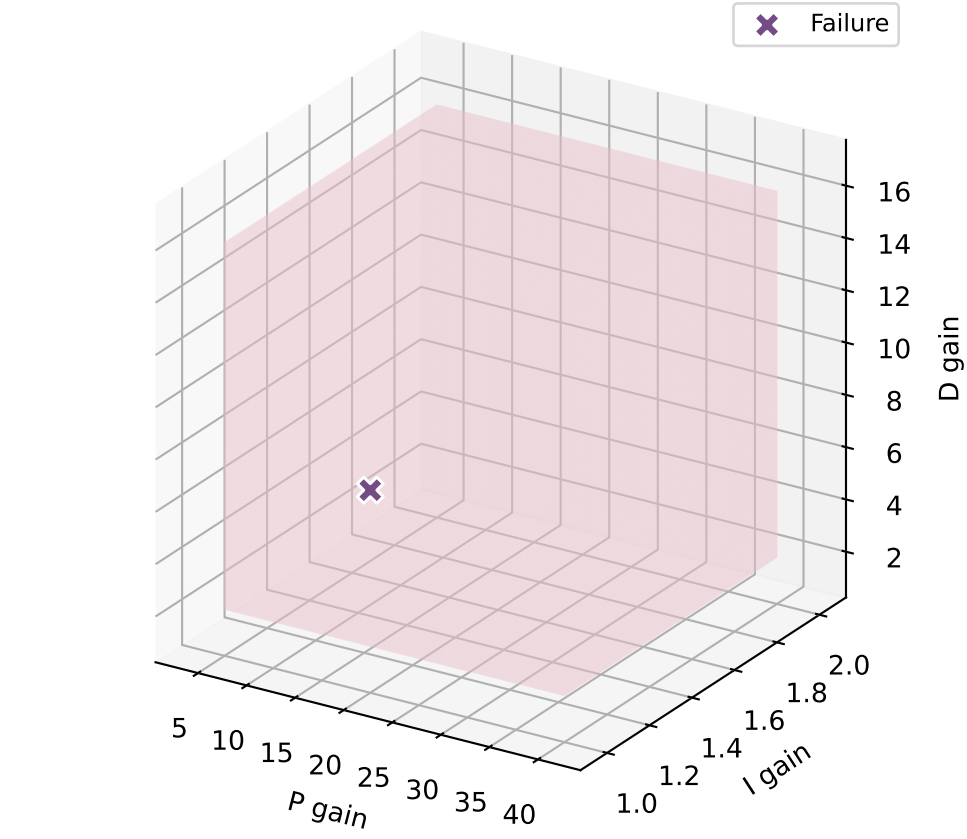

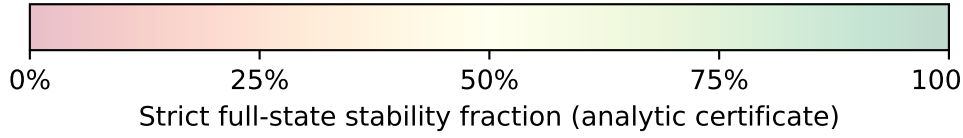

Analytical full-state stability assessment; no numerical poles were computed.
This is not a flight-failure probability. Pending nodes remain blank.
3D display cut at the recorded I; all computed data retained.

Analytical full-state stability assessment; no numerical poles were computed.
This is not a flight-failure probability. Pending nodes remain blank.
3D display cut at the recorded I; all computed data retained.

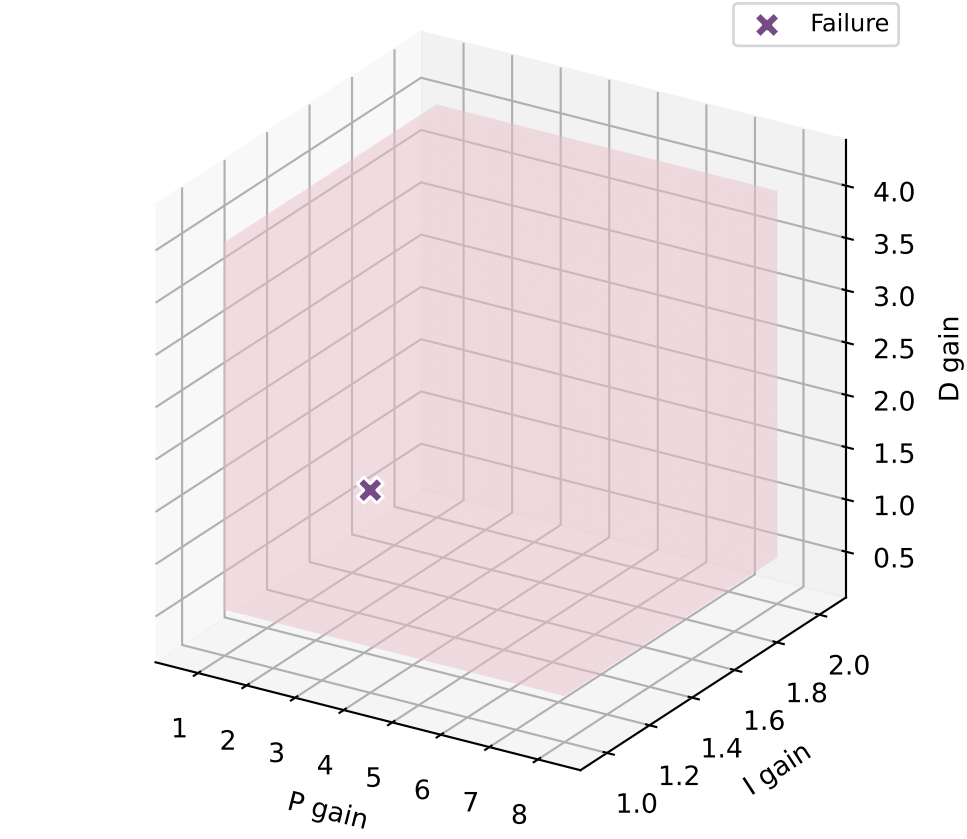

failure1 — Roll / Pitch PID / P, I, D
Analytic certificate — Certified displayed nodes 165528/165528; full grid 287496/287496

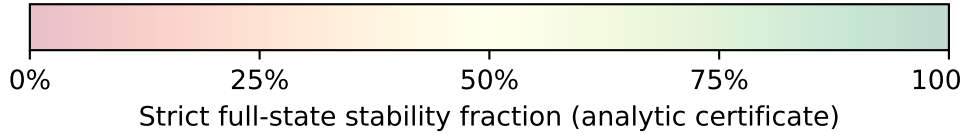

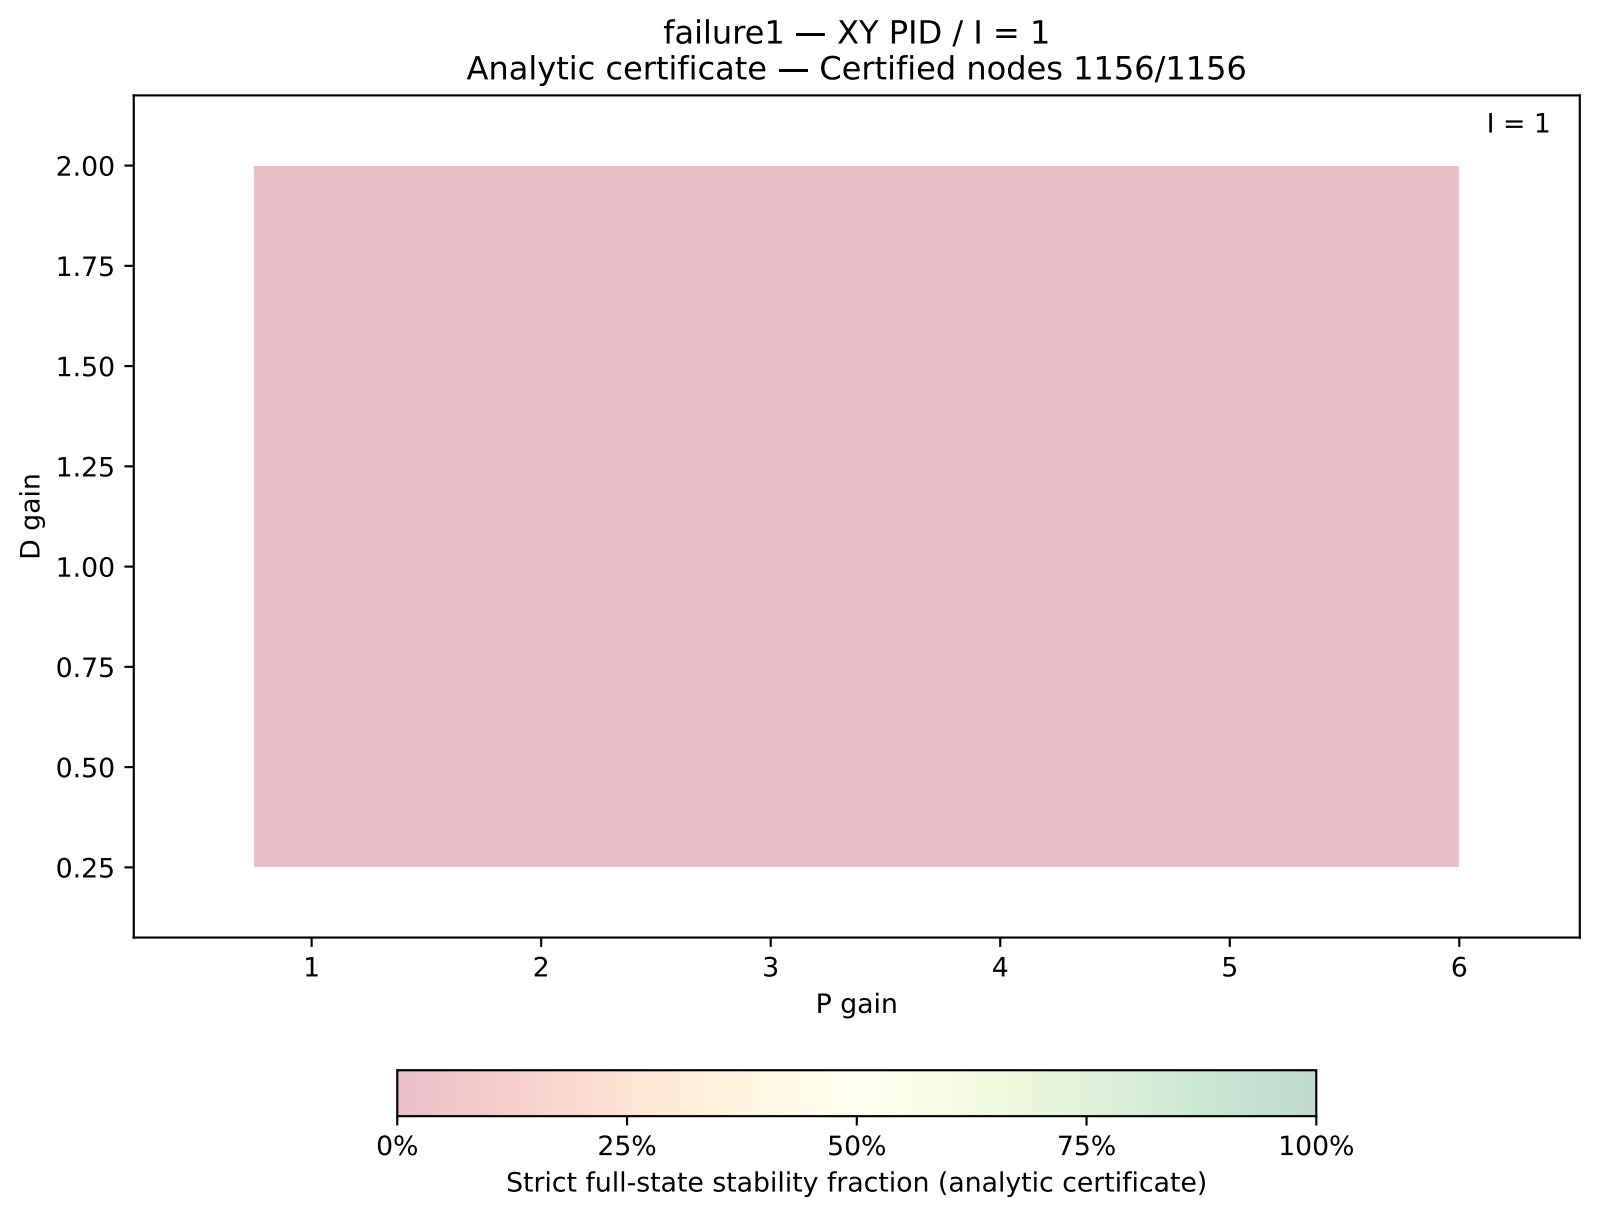

Analytical full-state stability assessment; no numerical poles were computed.
This is not a flight-failure probability. Pending nodes remain blank.
3D display cut at the recorded I; all computed data retained.

failure1 — Yaw PID / P, I, D
Analytic certificate — Certified displayed nodes 165528/165528; full grid 287496/287496

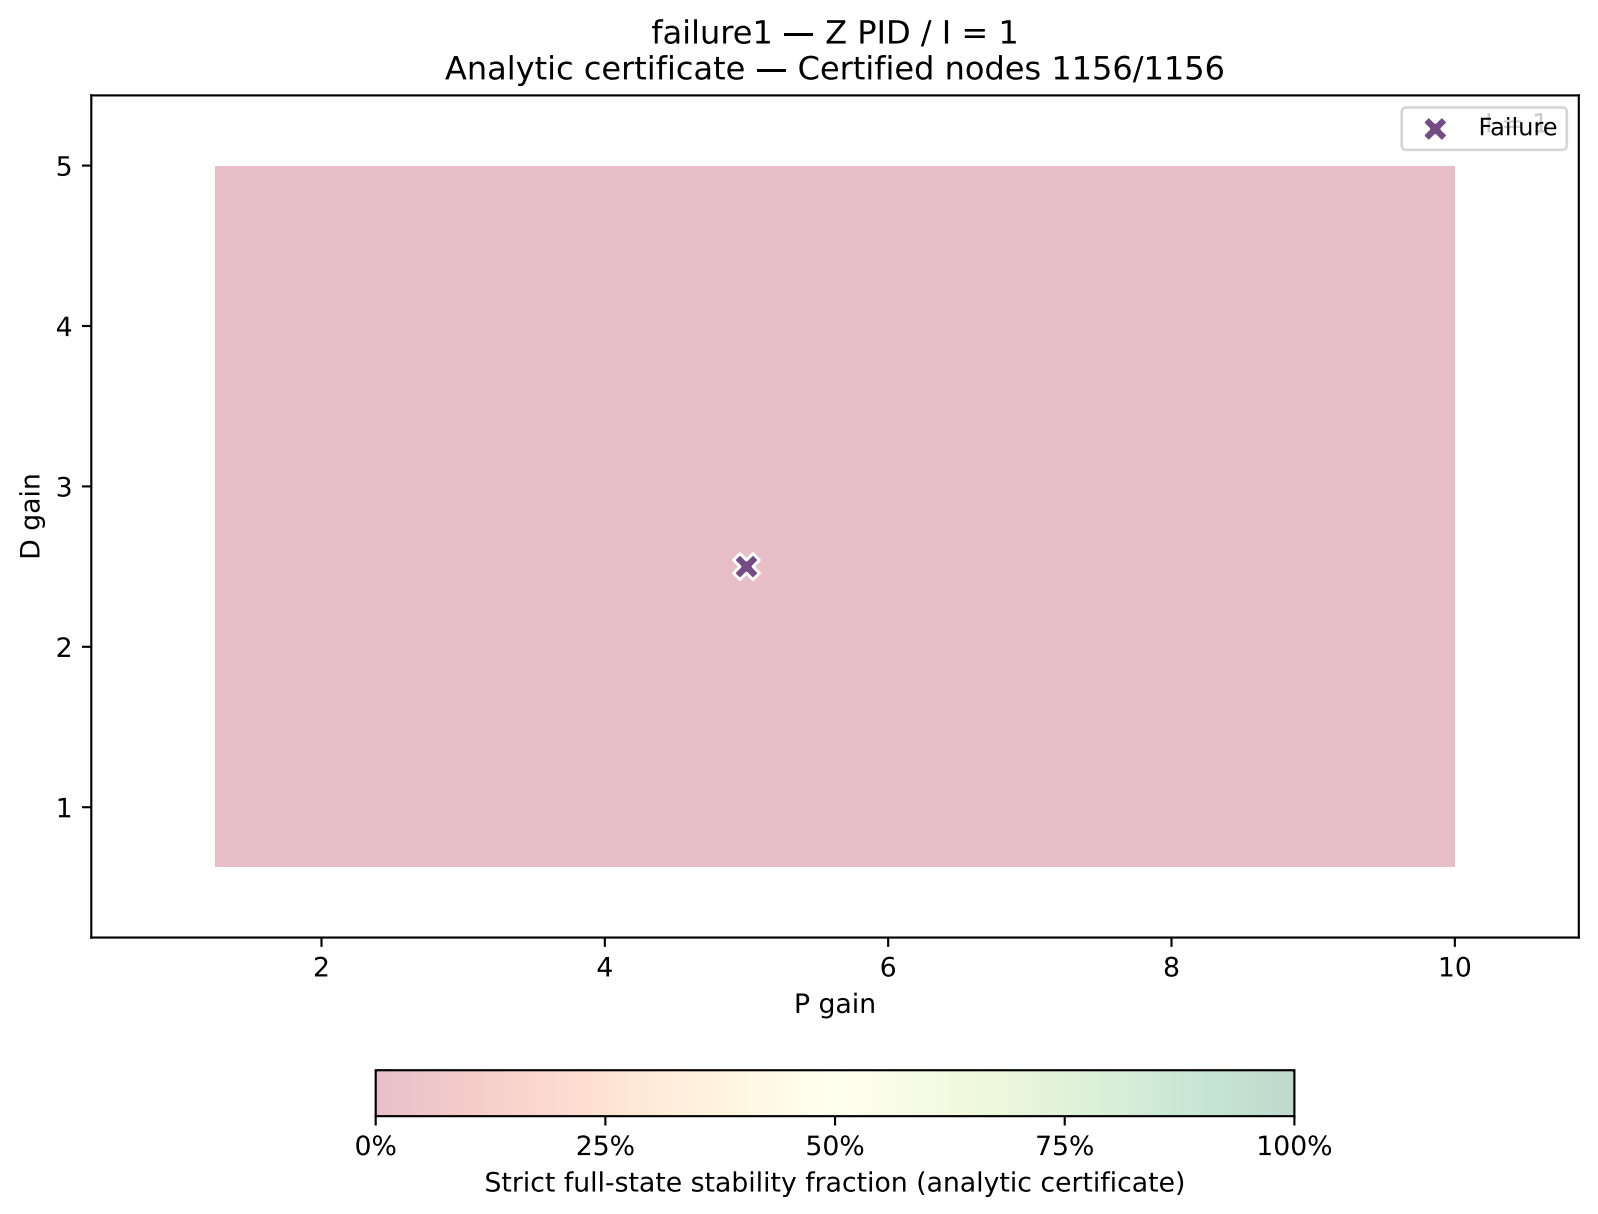

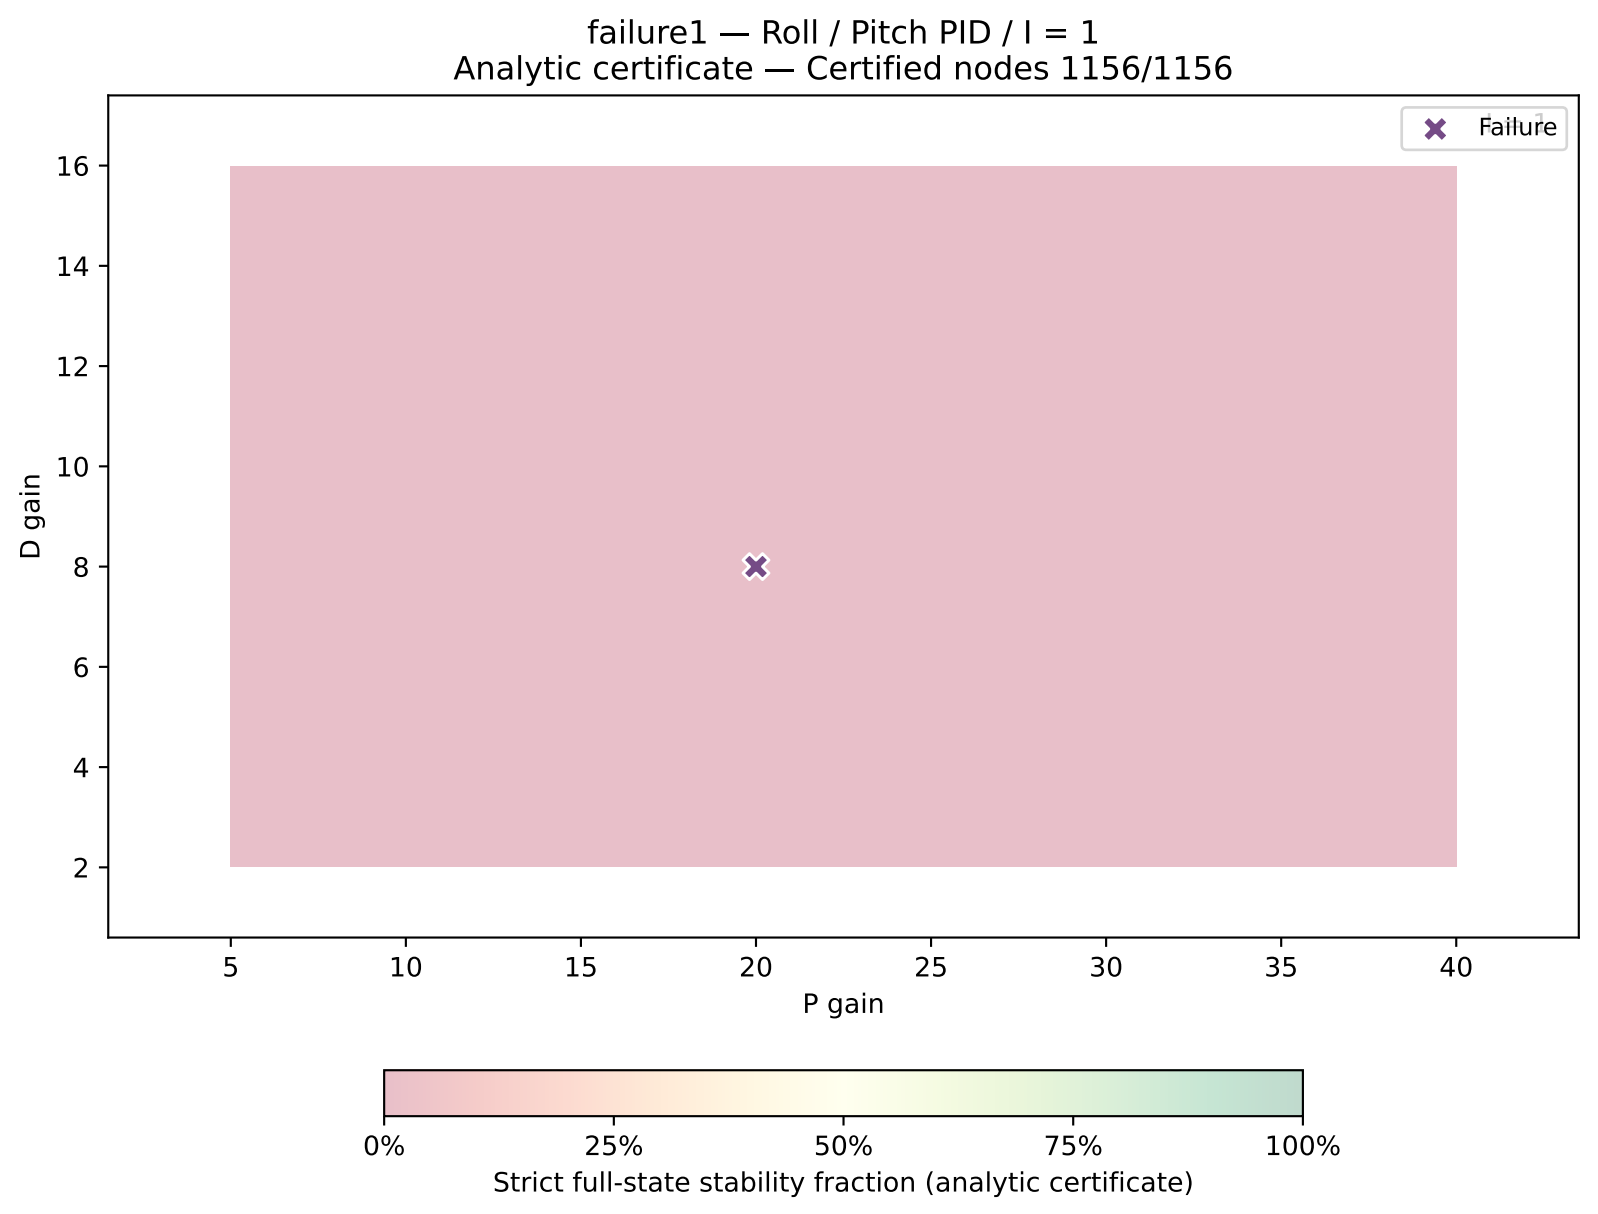

Analytical full-state stability assessment; no numerical poles were computed.
This is not a flight-failure probability. Pending nodes remain blank.
3D display cut at the recorded I; all computed data retained.

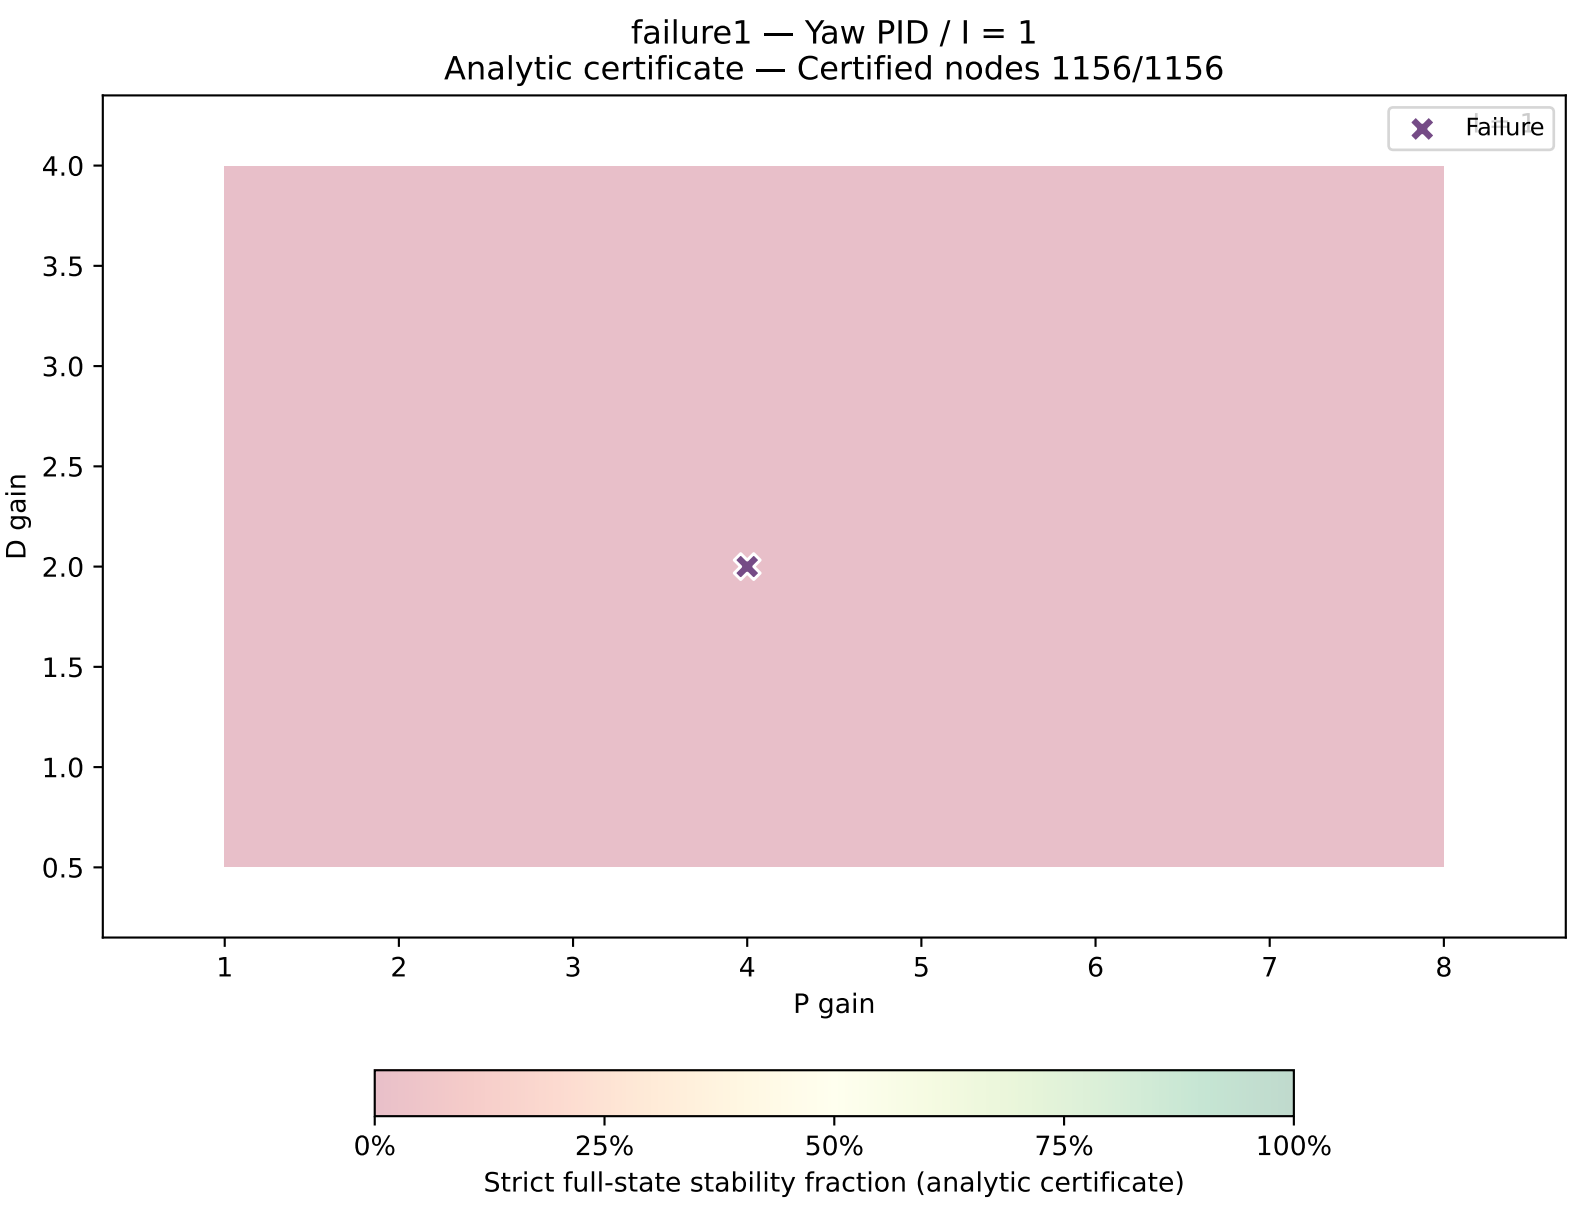

Analytical full-state stability assessment; no numerical poles were computed.
This is not a flight-failure probability. Pending nodes remain blank.
Recorded I=0.1 is off this plane; its marker is not projected.

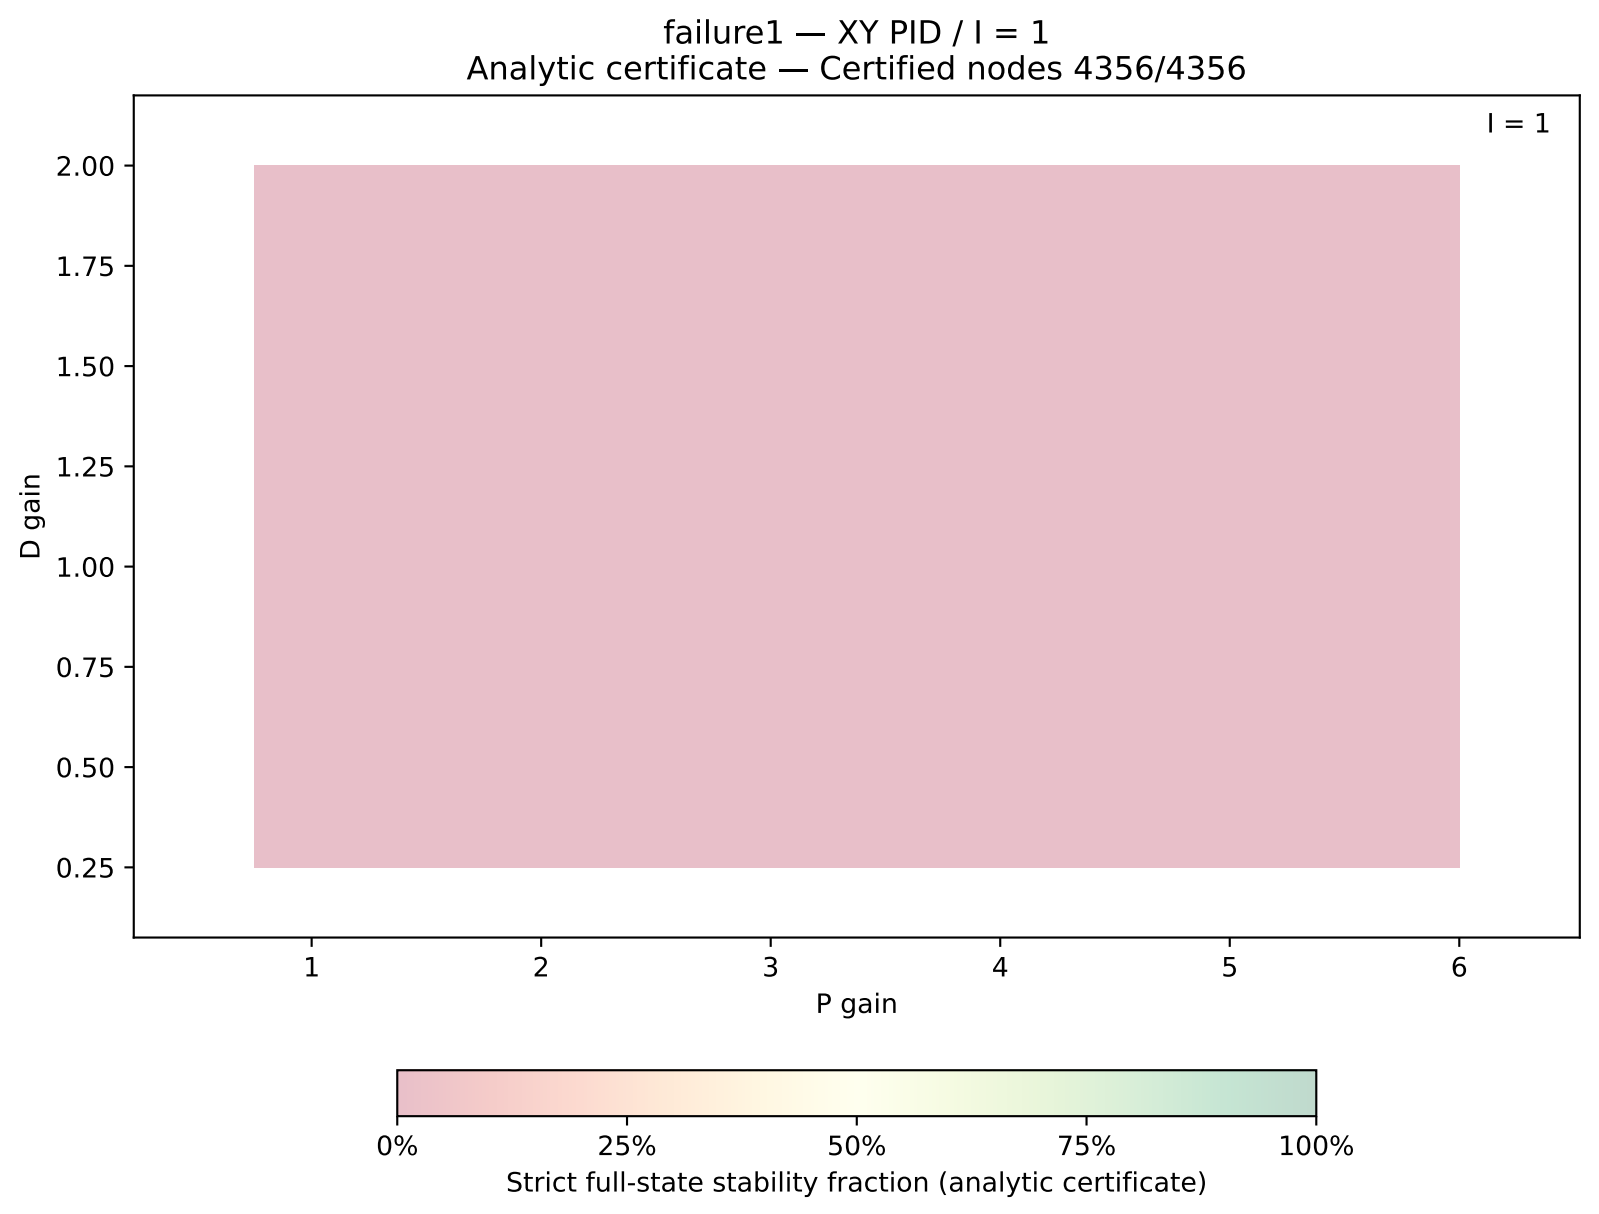

Analytical full-state stability assessment; no numerical poles were computed.
This is not a flight-failure probability. Pending nodes remain blank.

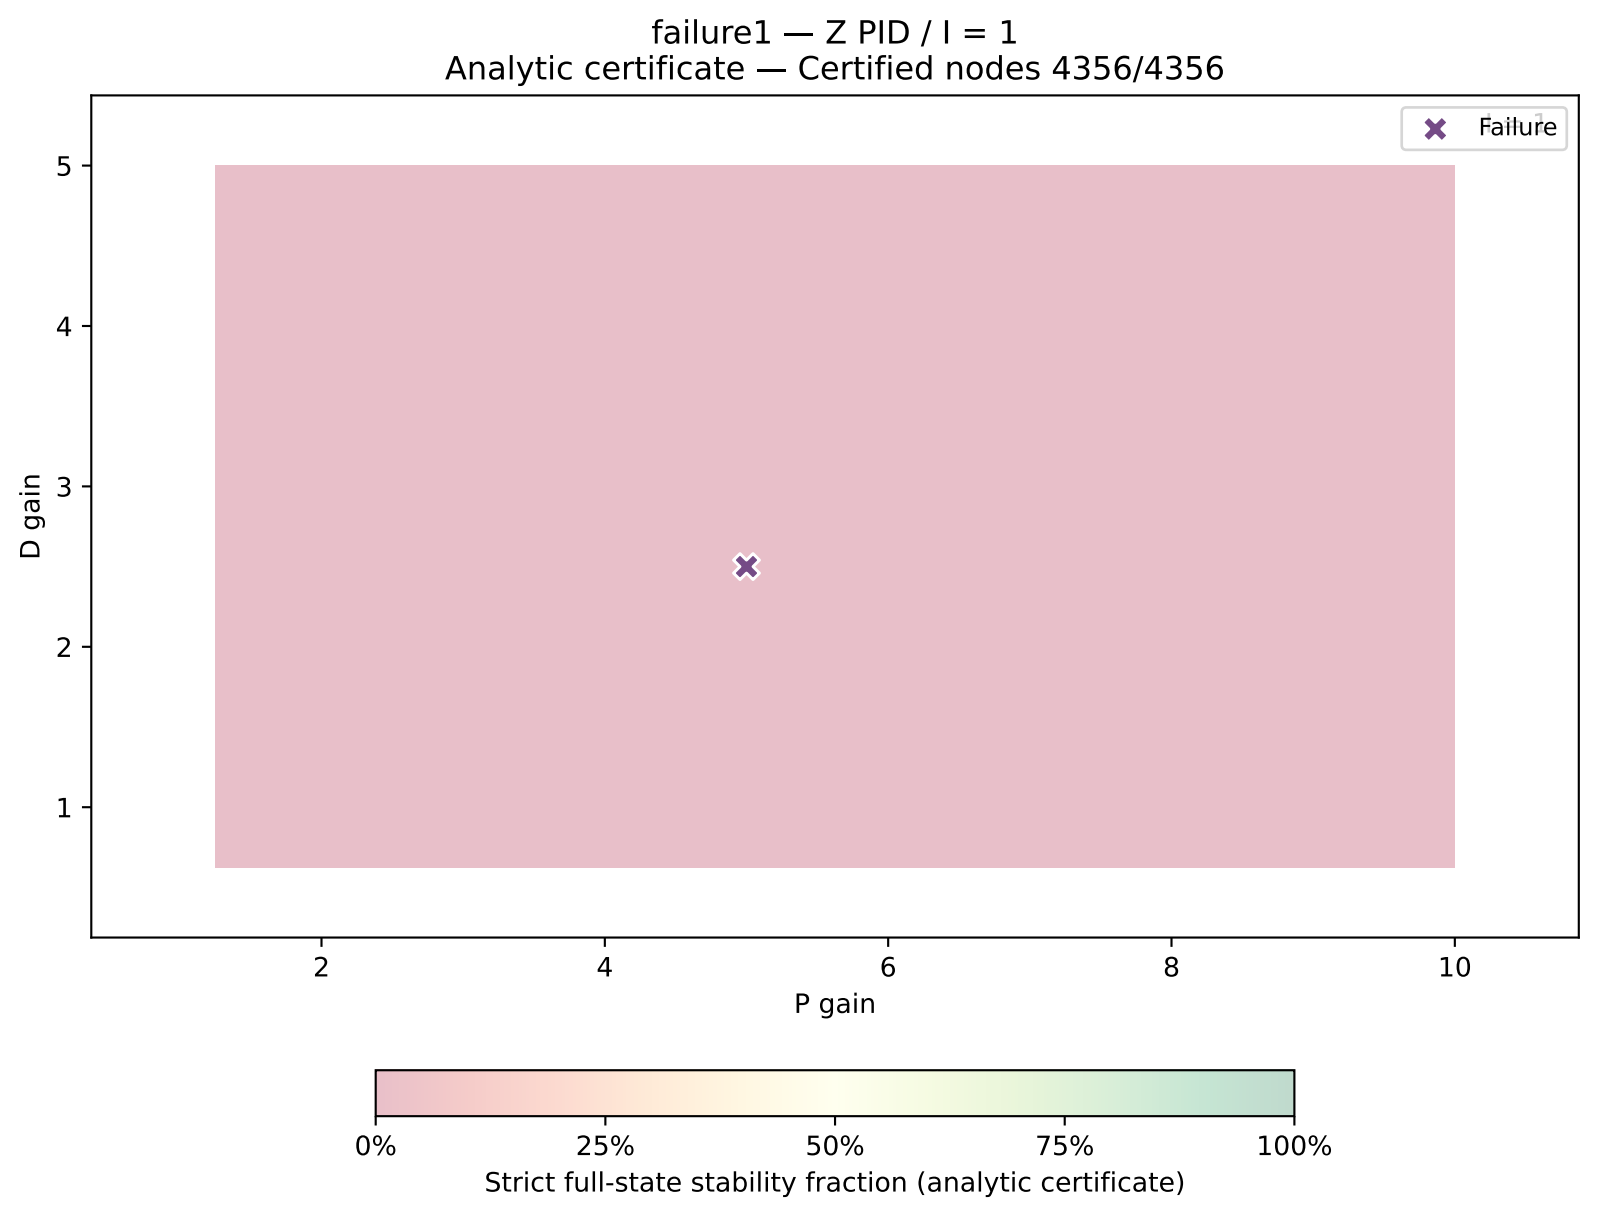

Analytical full-state stability assessment; no numerical poles were computed.
This is not a flight-failure probability. Pending nodes remain blank.

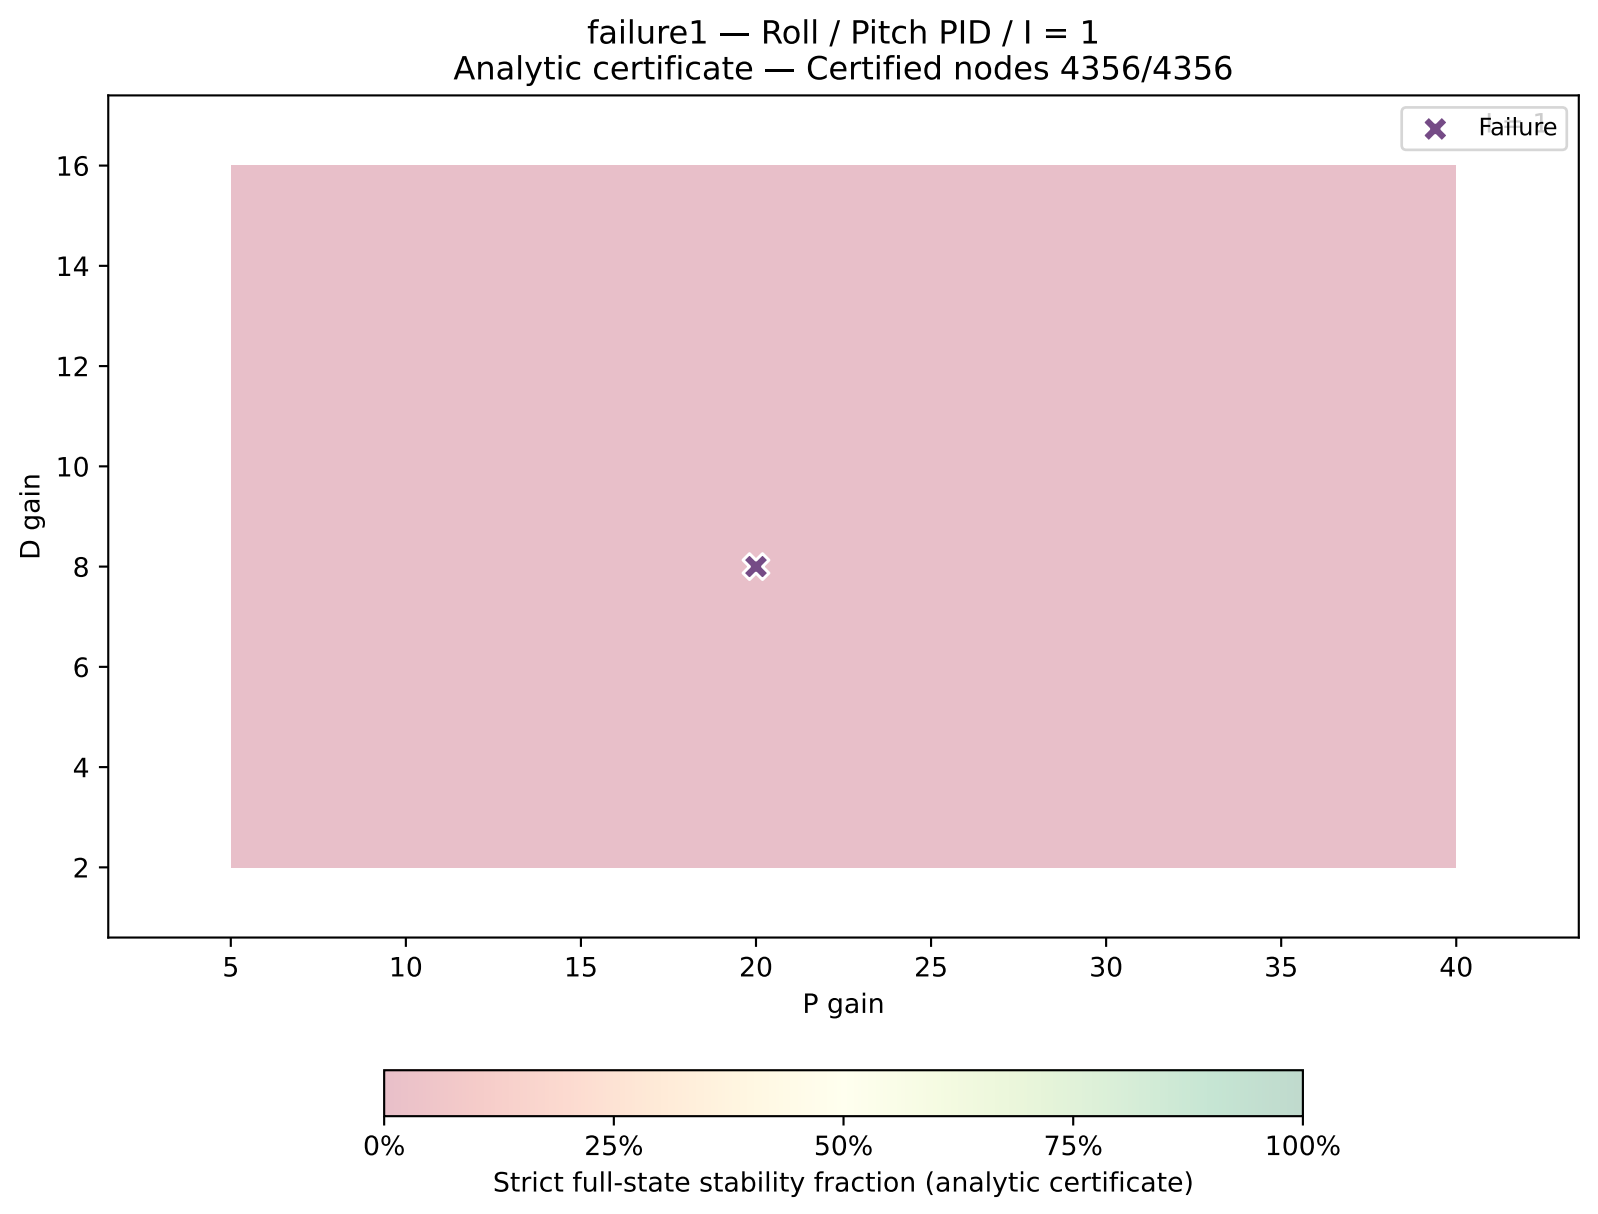

Analytical full-state stability assessment; no numerical poles were computed.
This is not a flight-failure probability. Pending nodes remain blank.

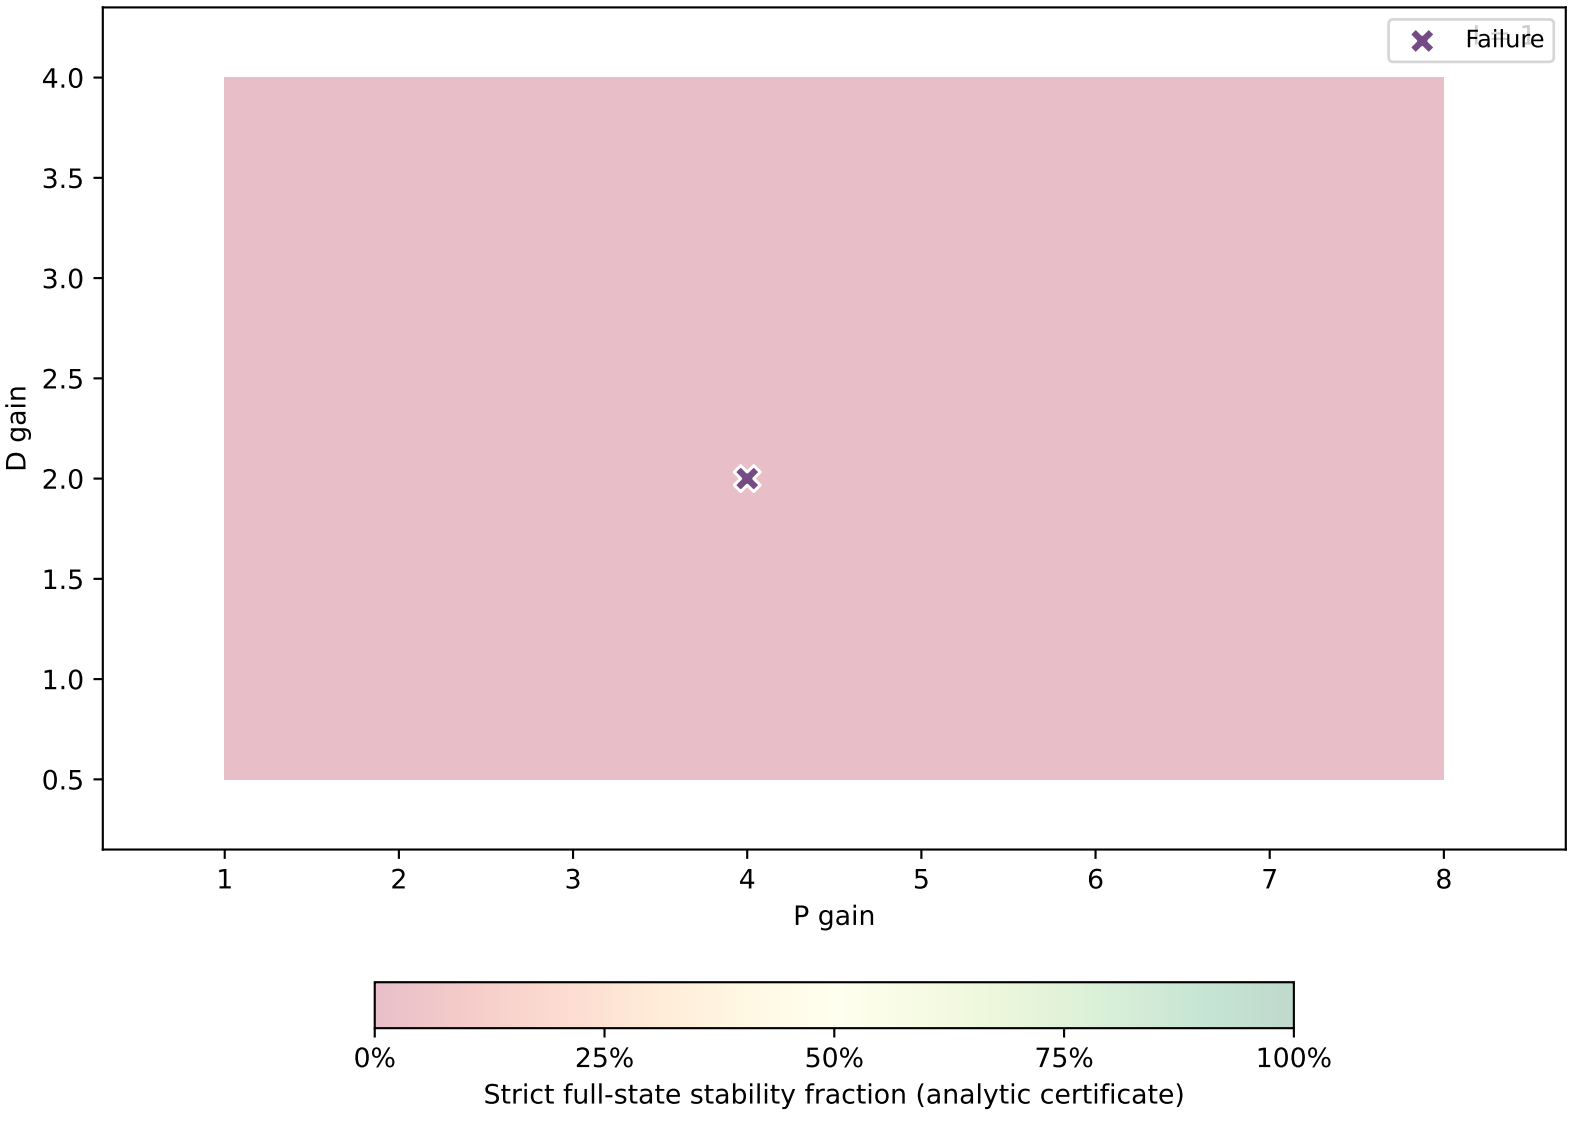

Analytical full-state stability assessment; no numerical poles were computed.
This is not a flight-failure probability. Pending nodes remain blank.
Recorded I=0.1 is off this plane; its marker is not projected.

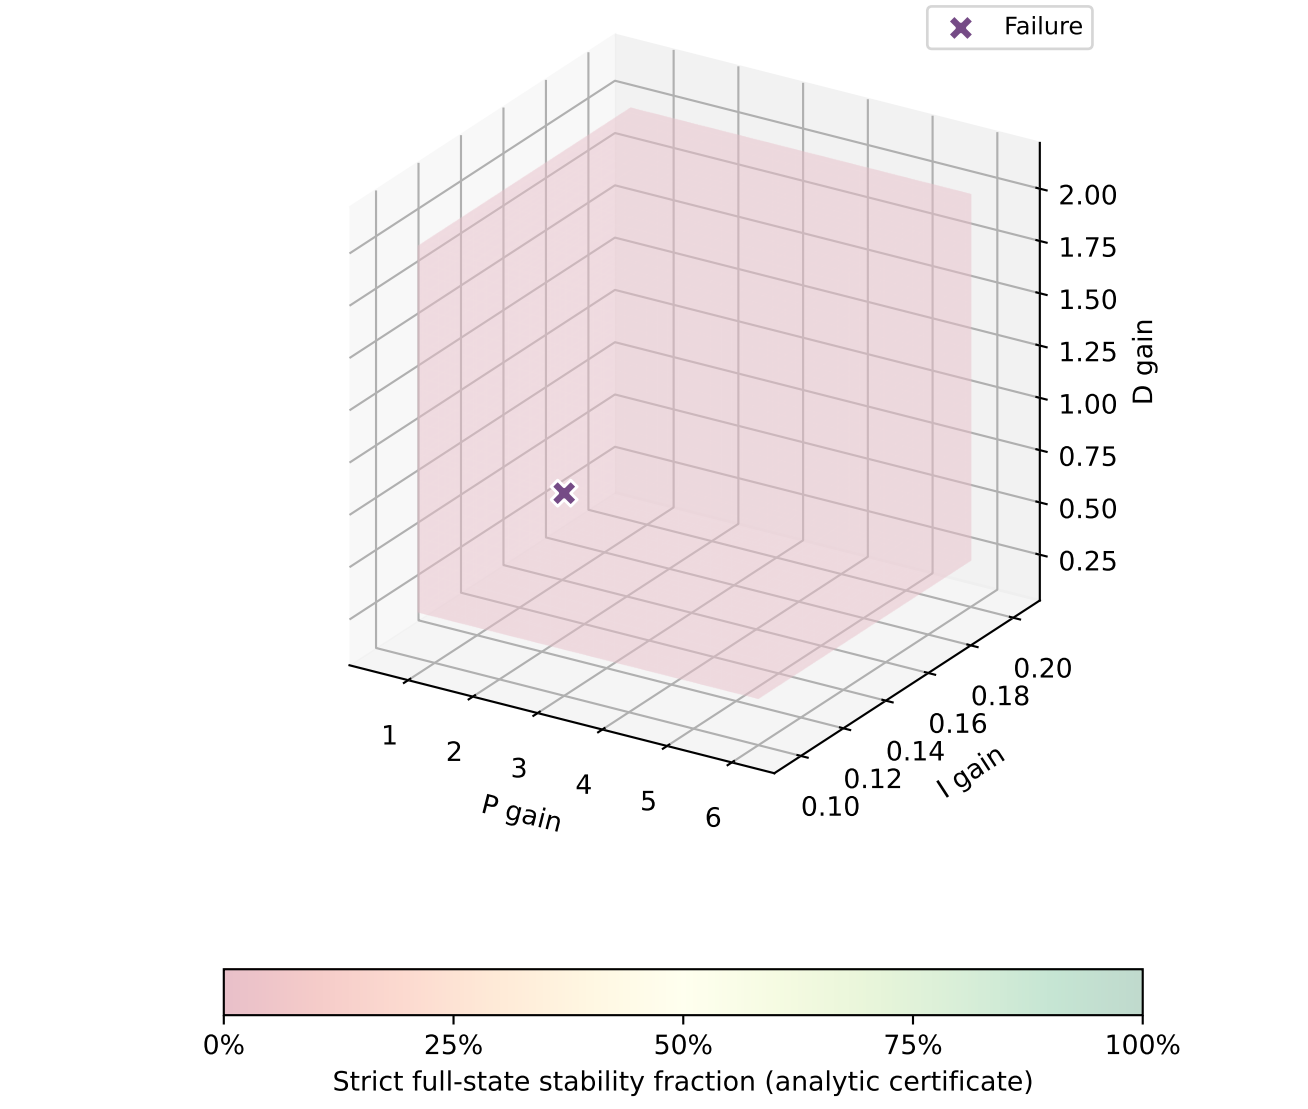

Analytical full-state stability assessment; no numerical poles were computed.
This is not a flight-failure probability. Pending nodes remain blank.

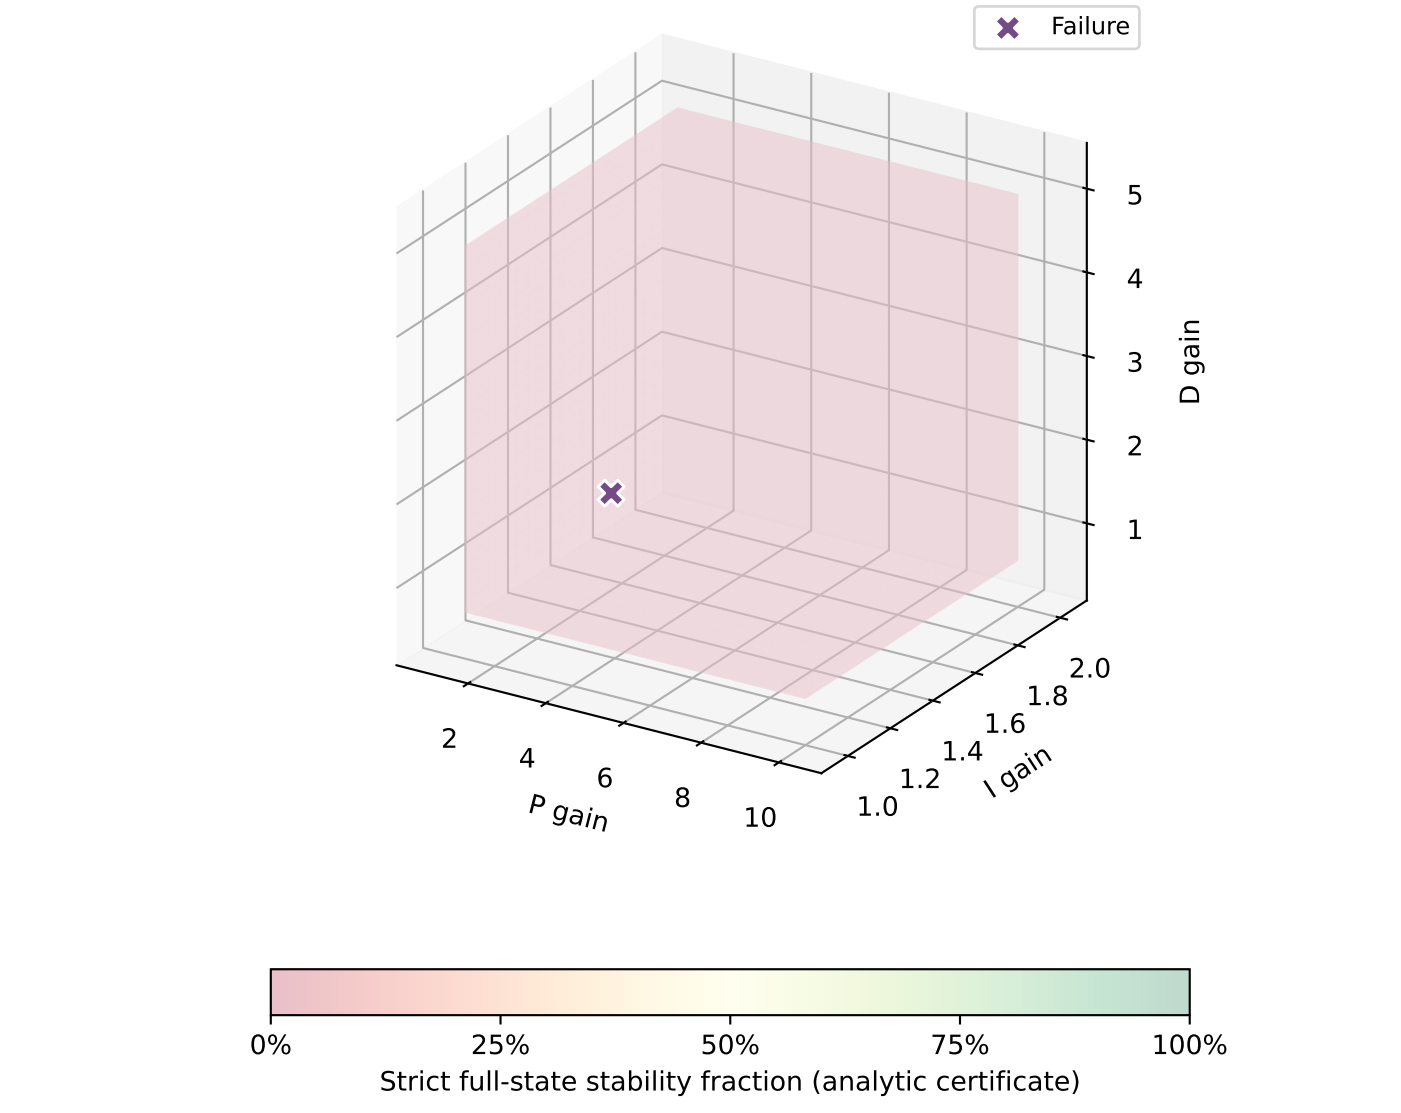

Analytical full-state stability assessment; no numerical poles were computed.
This is not a flight-failure probability. Pending nodes remain blank.

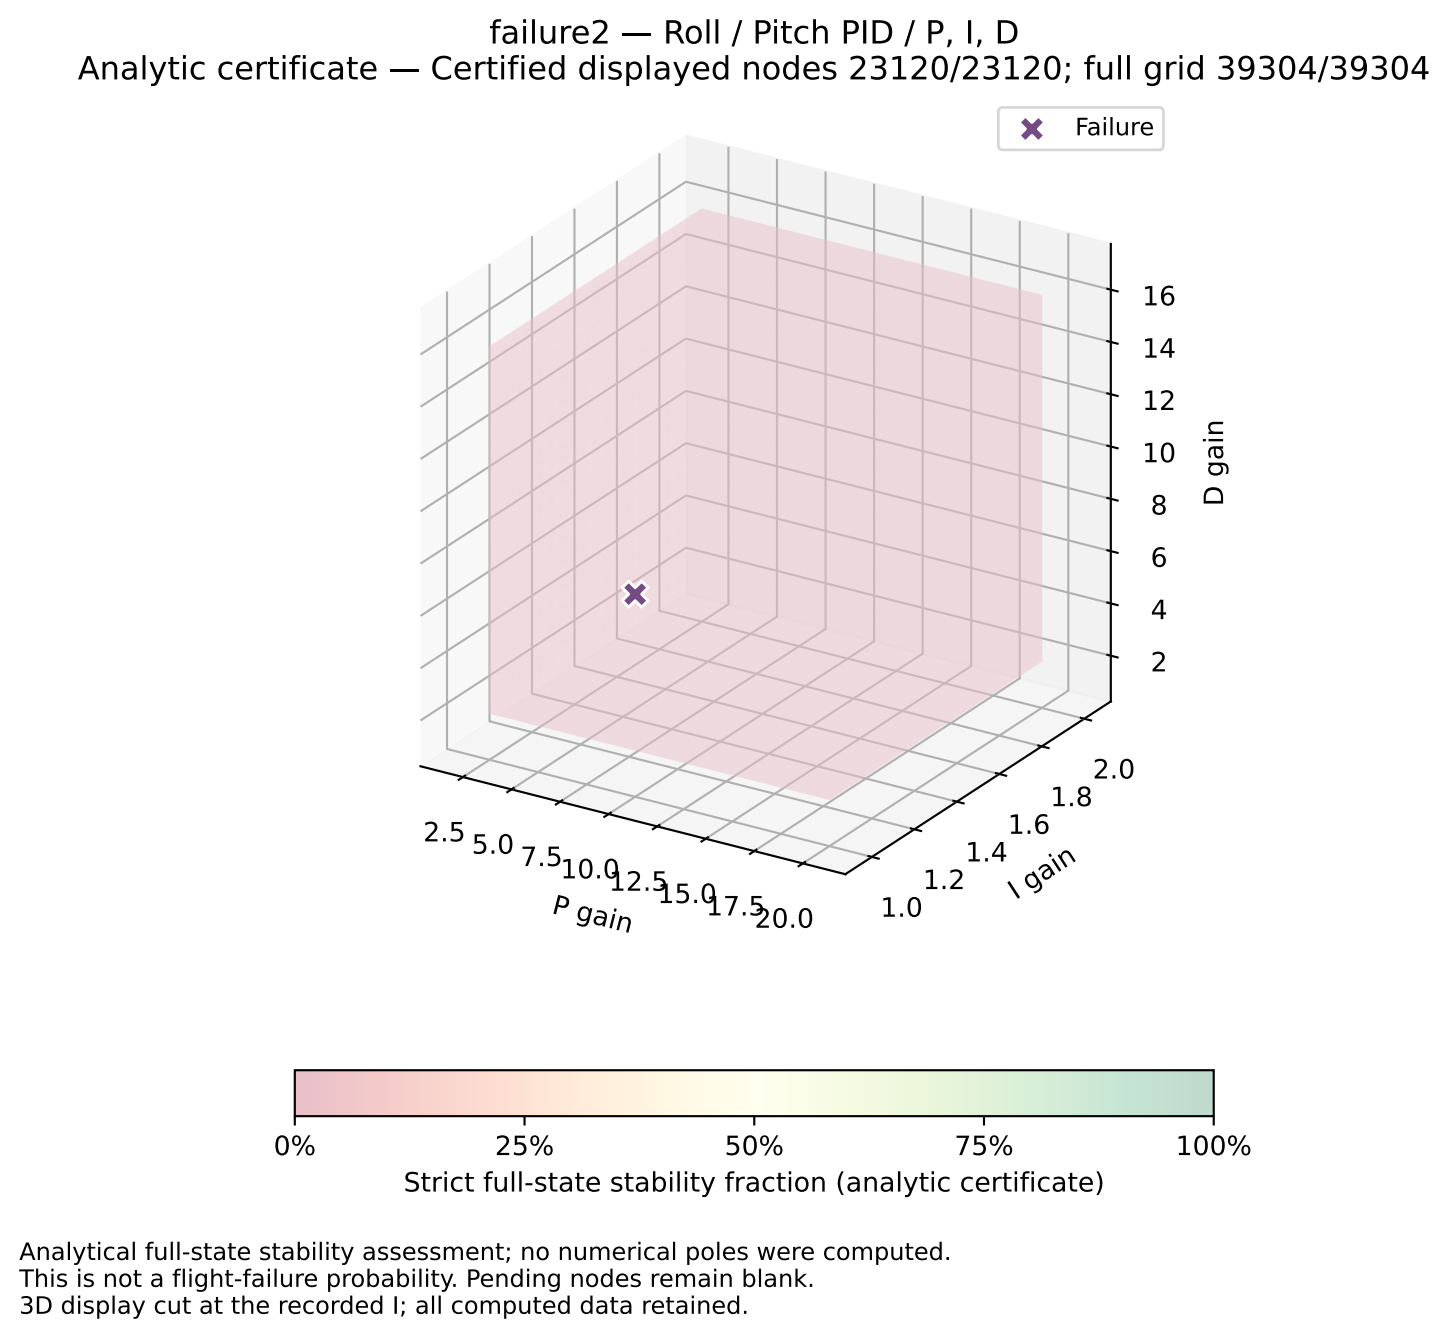

Analytical full-state stability assessment; no numerical poles were computed.
This is not a flight-failure probability. Pending nodes remain blank.

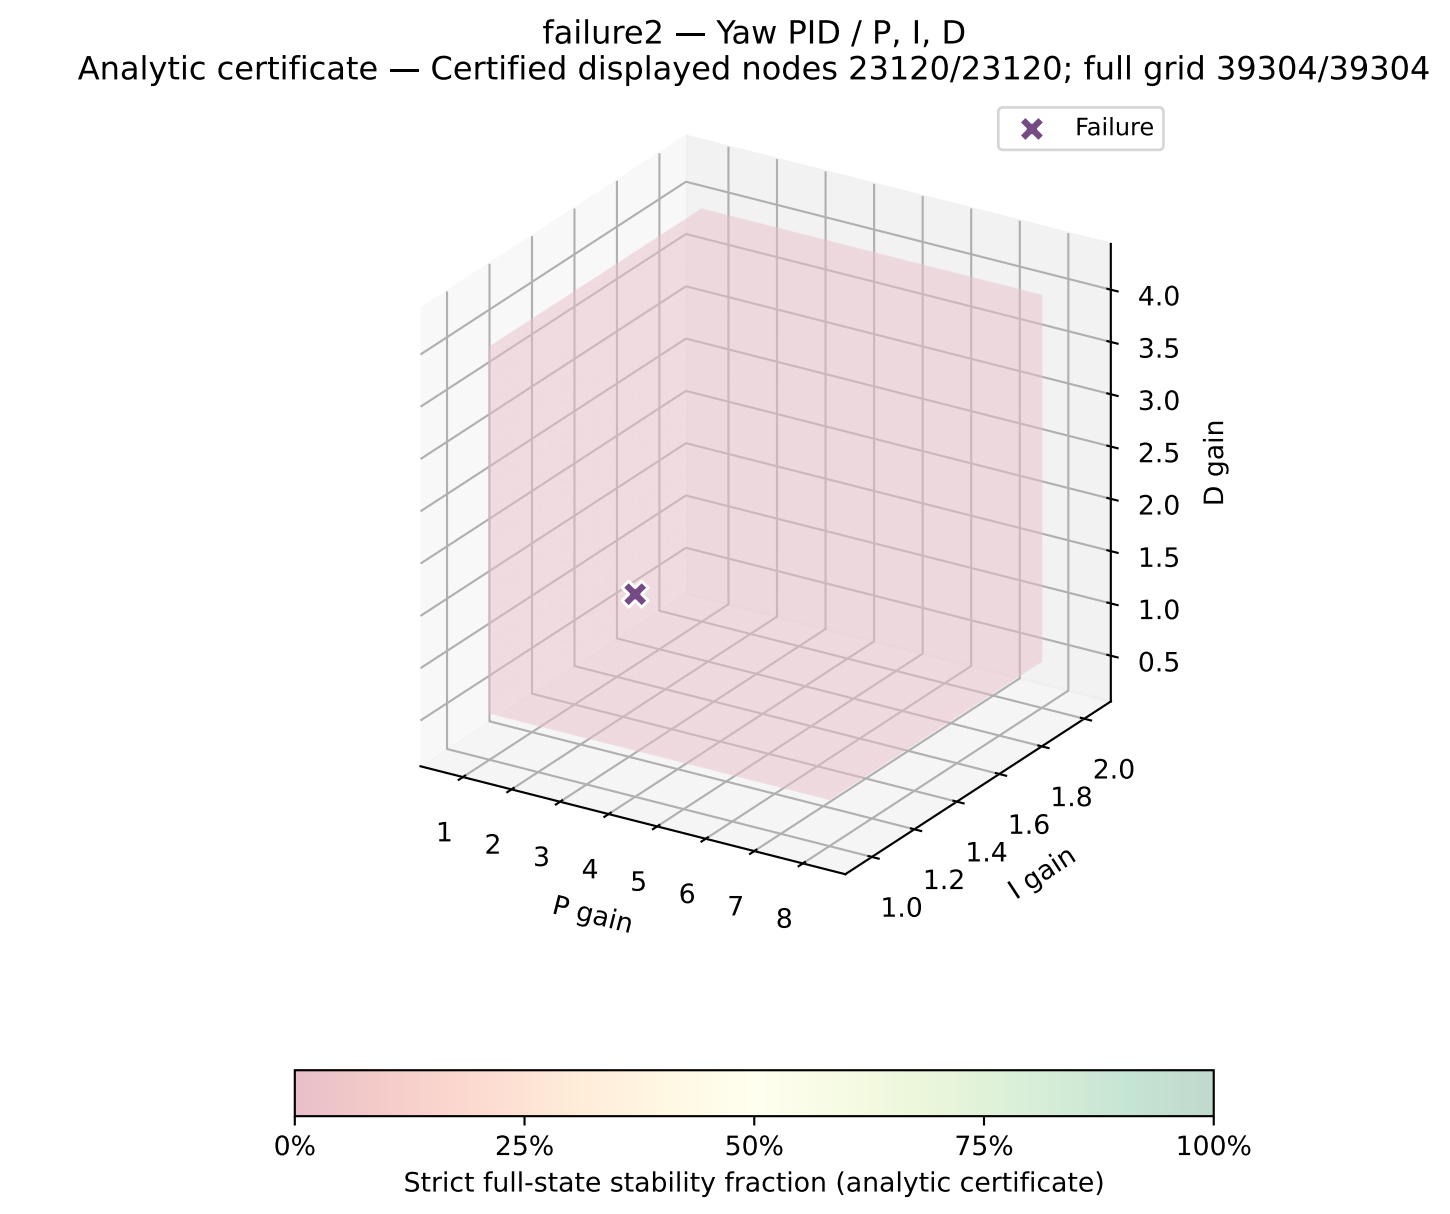

Analytical full-state stability assessment; no numerical poles were computed.
This is not a flight-failure probability. Pending nodes remain blank.
3D display cut at the recorded I; all computed data retained.

Analytical full-state stability assessment; no numerical poles were computed.
This is not a flight-failure probability. Pending nodes remain blank.
3D display cut at the recorded I; all computed data retained.

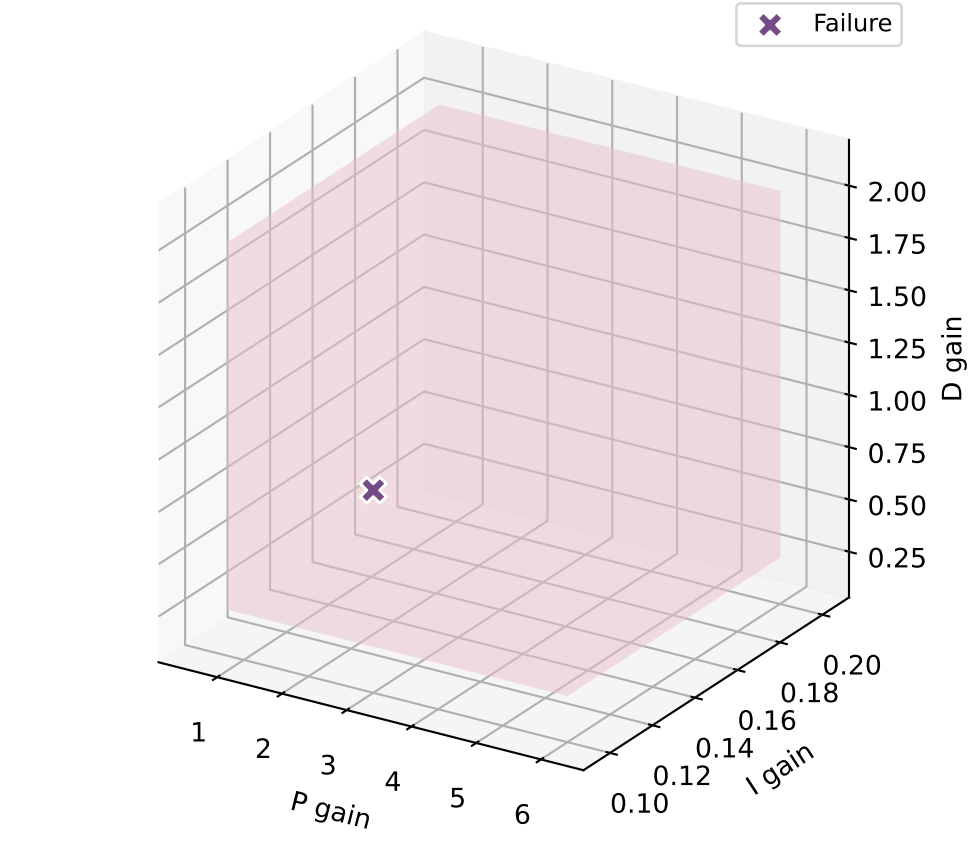

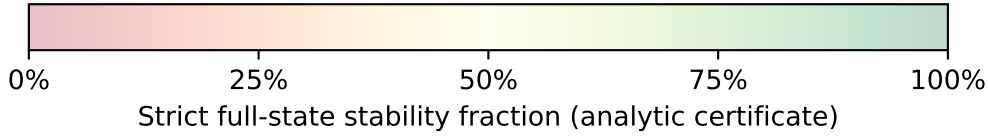

Analytical full-state stability assessment; no numerical poles were computed.
This is not a flight-failure probability. Pending nodes remain blank.
3D display cut at the recorded I; all computed data retained.

Analytical full-state stability assessment; no numerical poles were computed.
This is not a flight-failure probability. Pending nodes remain blank.
3D display cut at the recorded I; all computed data retained.

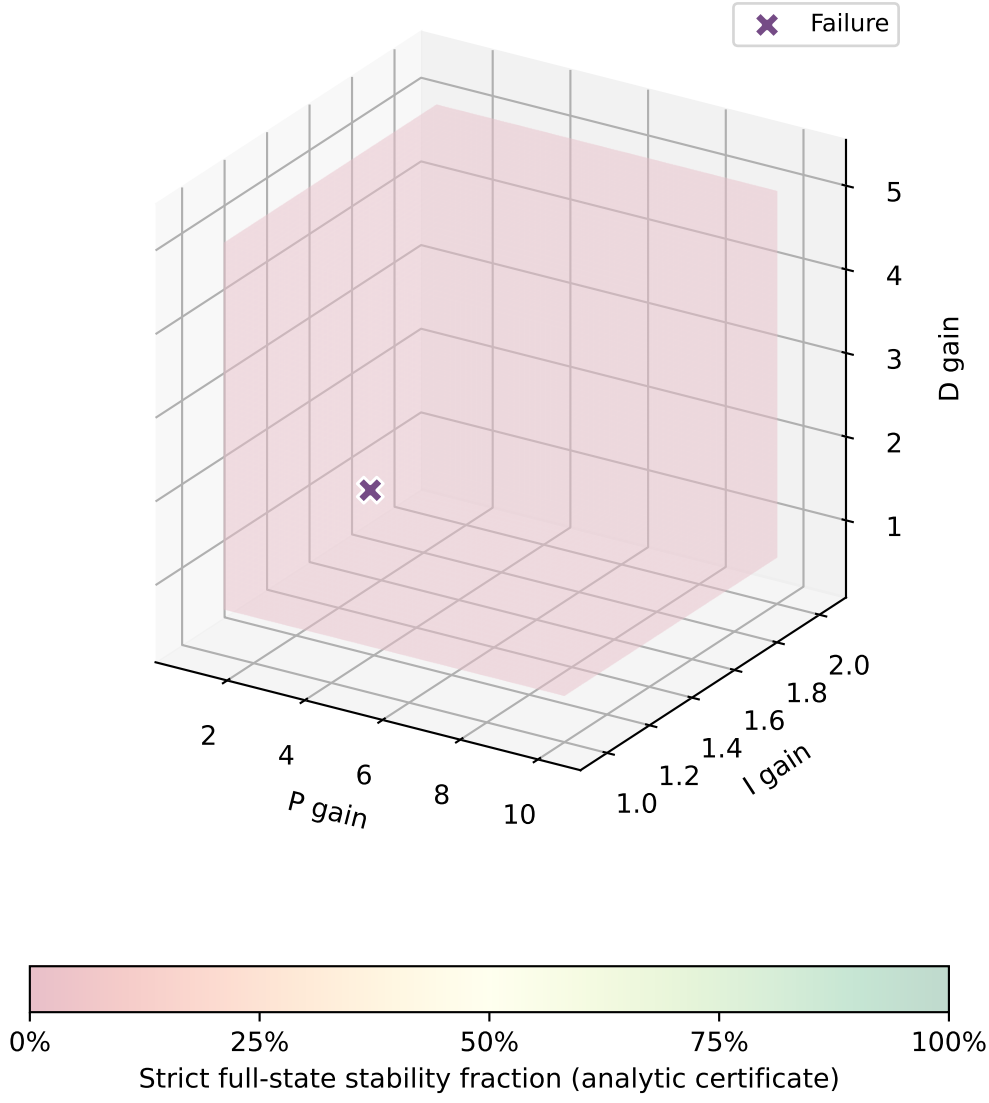

failure2 — XY PID / P, I, D
Analytic certificate — Certified displayed nodes 165528/165528; full grid 287496/287496

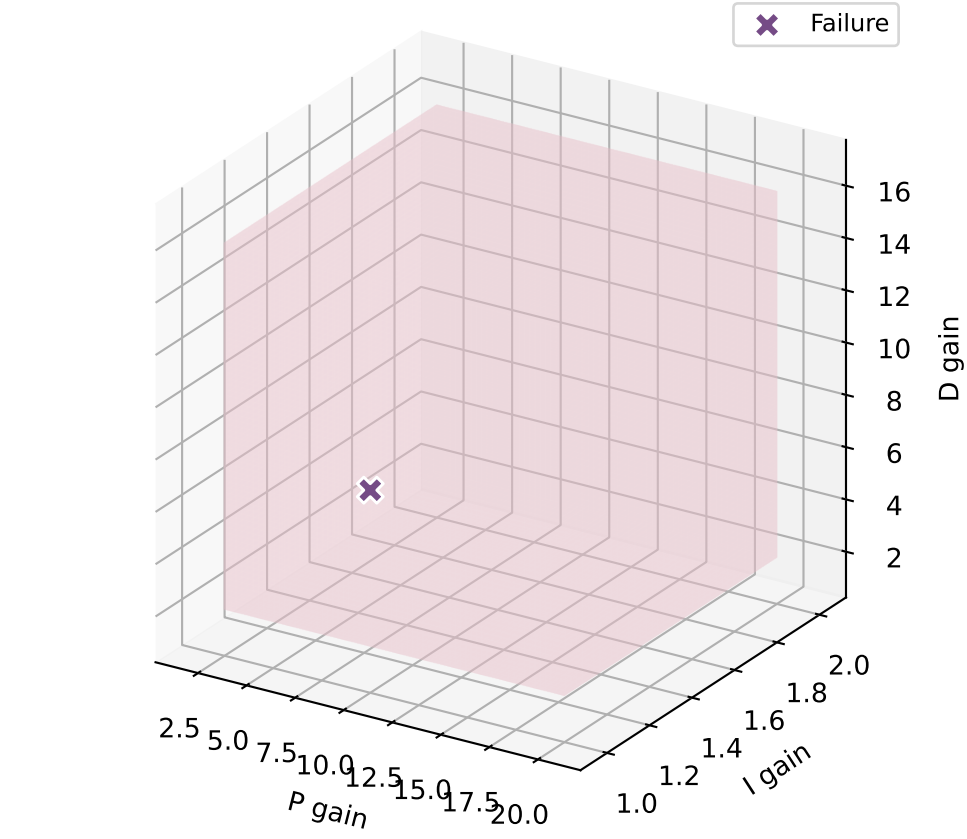

Analytical full-state stability assessment; no numerical poles were computed.
This is not a flight-failure probability. Pending nodes remain blank.
3D display cut at the recorded I; all computed data retained.

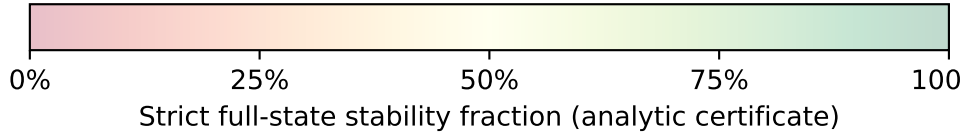

failure2 — Z PID / P, I, D
Analytic certificate — Certified displayed nodes 165528/165528; full grid 287496/287496

Analytical full-state stability assessment; no numerical poles were computed.
This is not a flight-failure probability. Pending nodes remain blank.
3D display cut at the recorded I; all computed data retained.

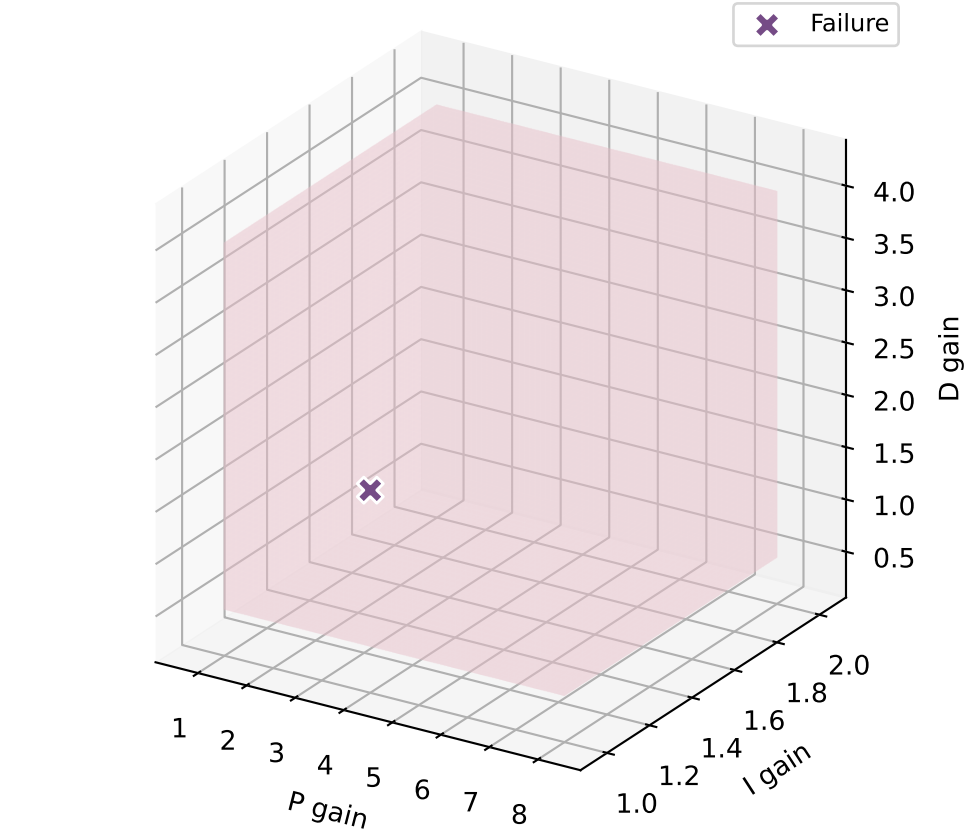

failure2 — Roll / Pitch PID / P, I, D
Analytic certificate — Certified displayed nodes 165528/165528; full grid 287496/287496

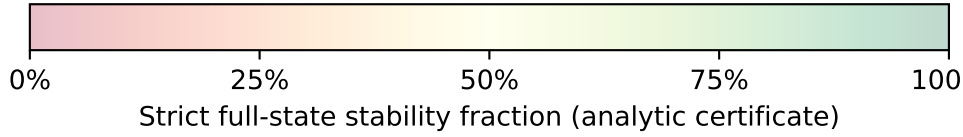

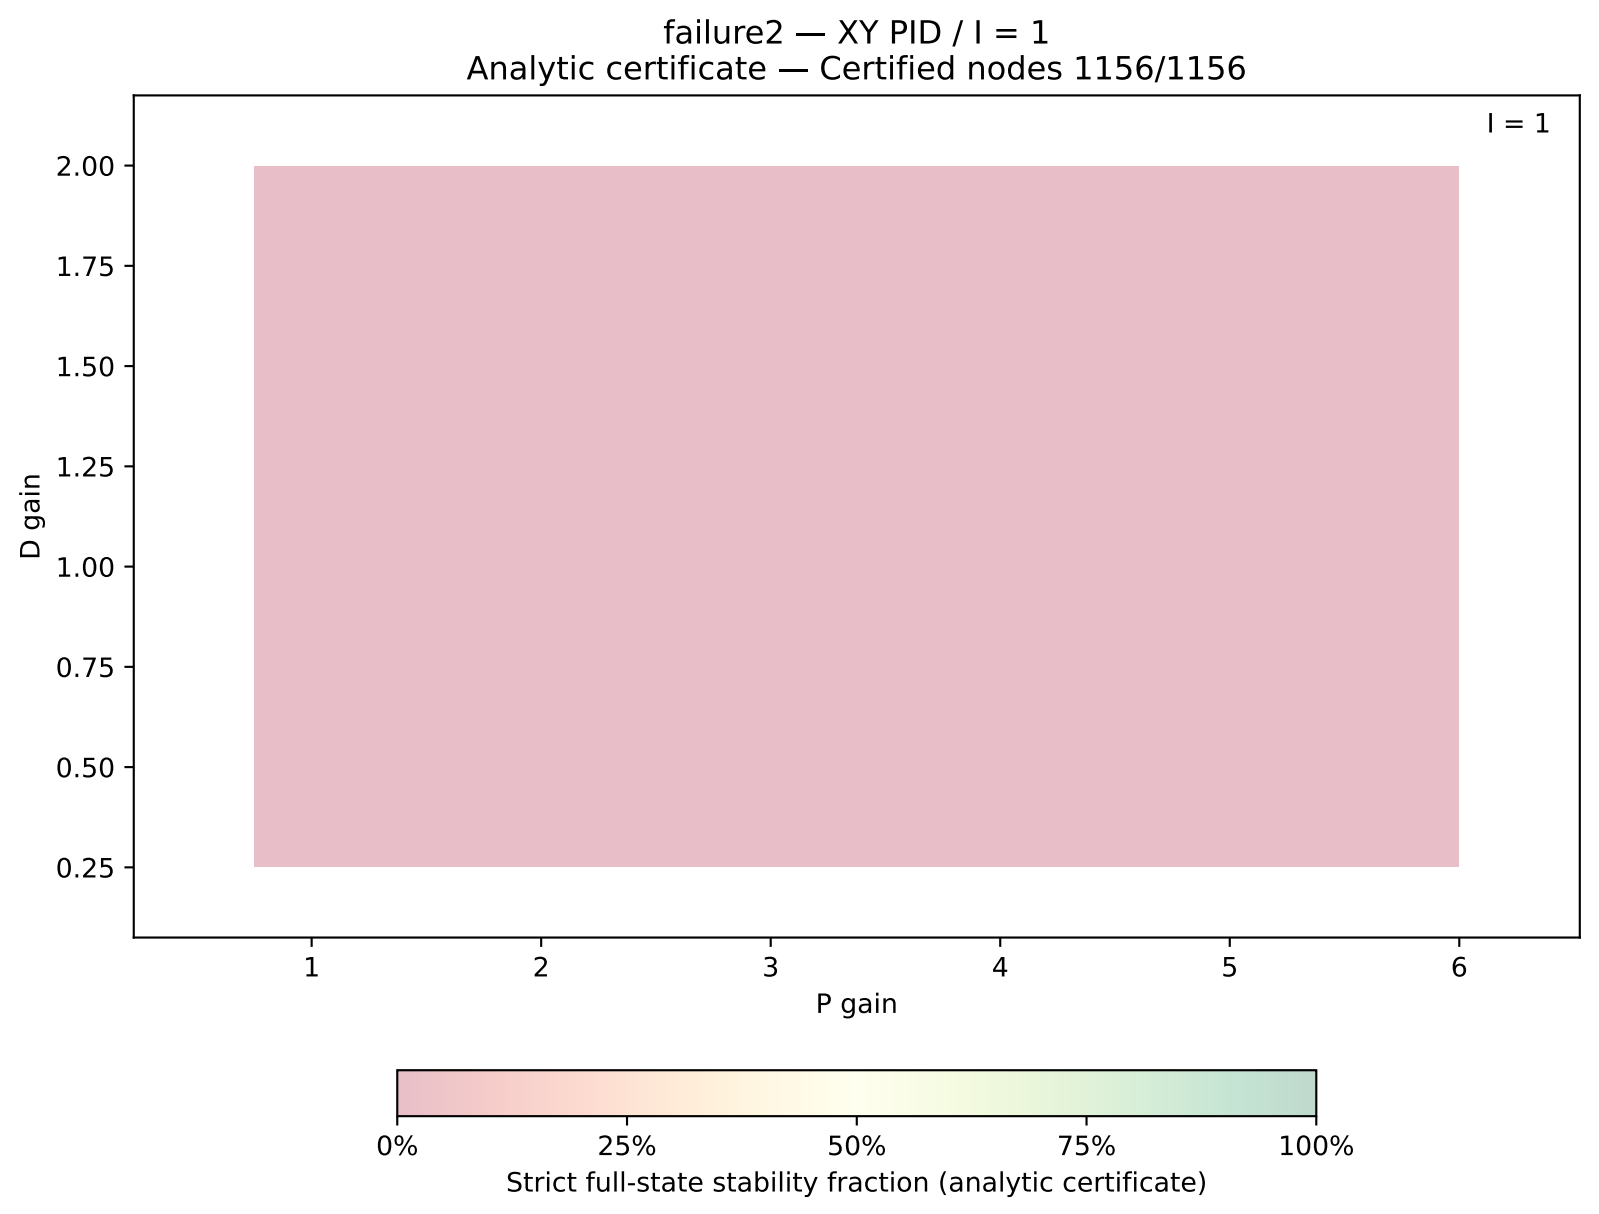

Analytical full-state stability assessment; no numerical poles were computed.
This is not a flight-failure probability. Pending nodes remain blank.
3D display cut at the recorded I; all computed data retained.

failure2 — Yaw PID / P, I, D
Analytic certificate — Certified displayed nodes 165528/165528; full grid 287496/287496

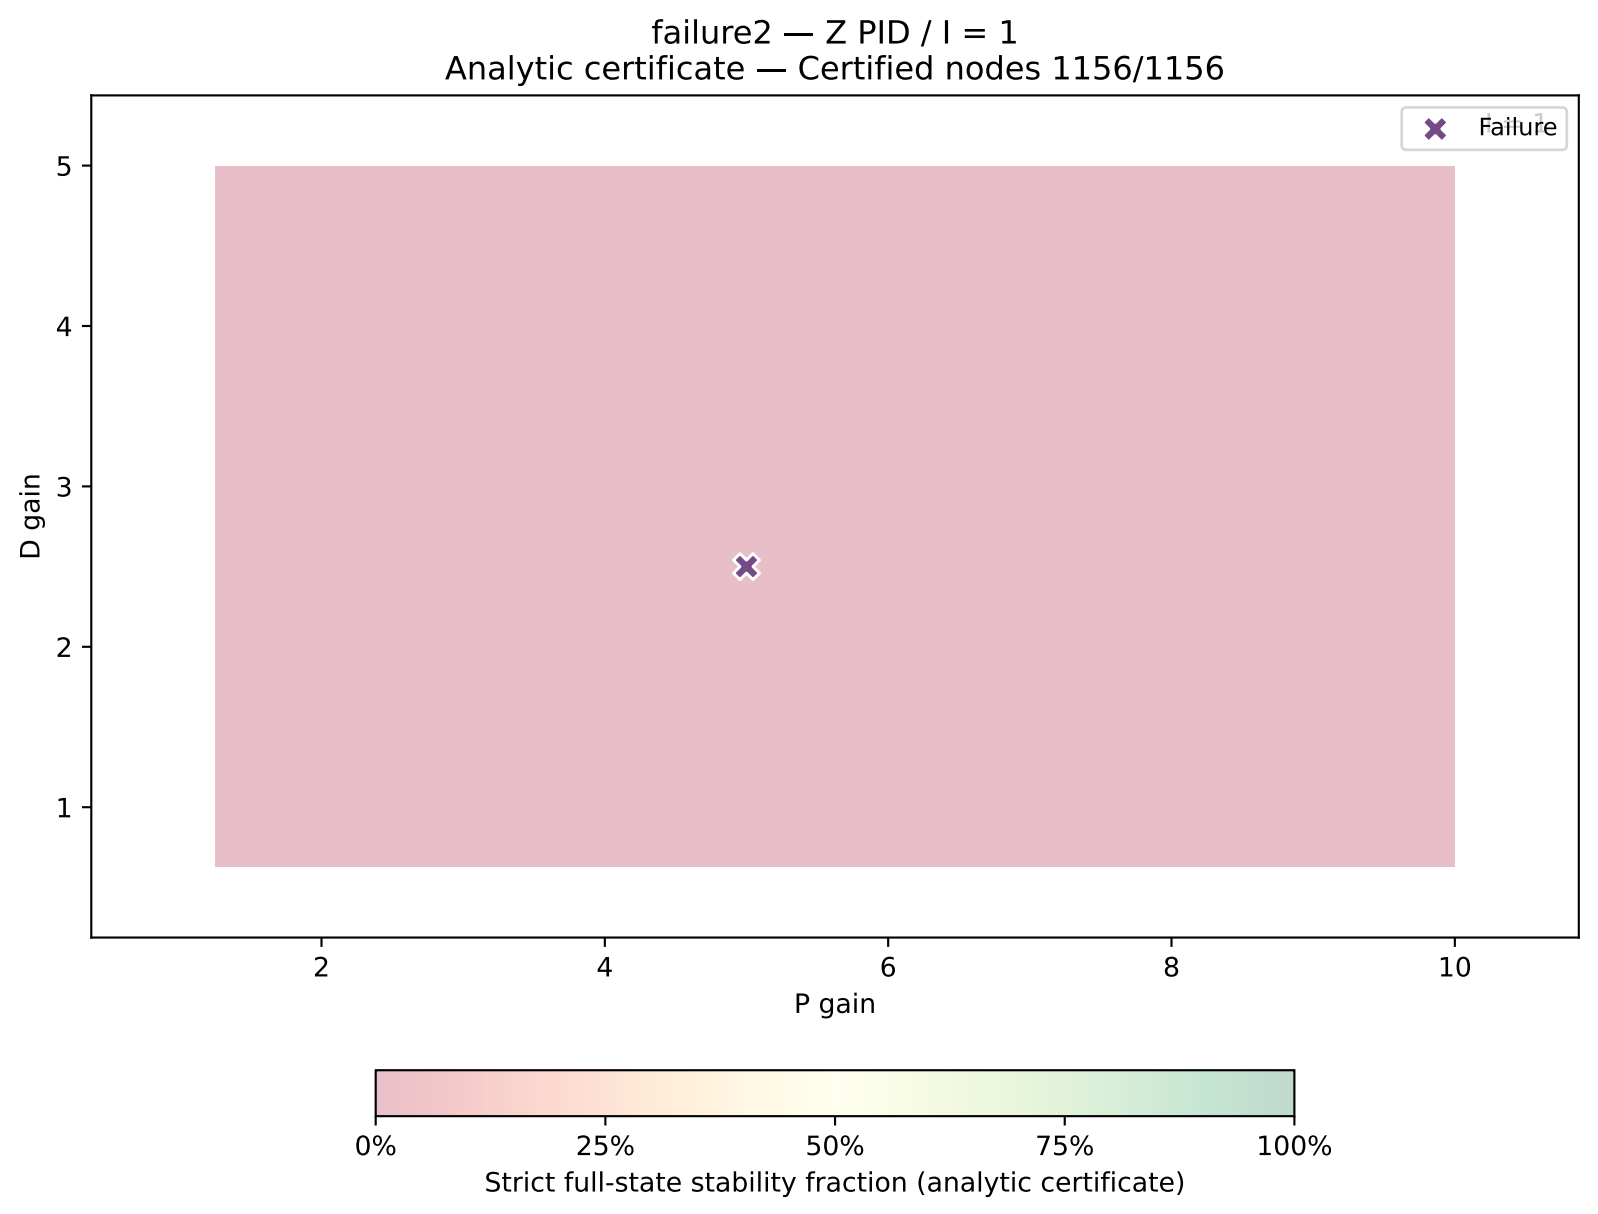

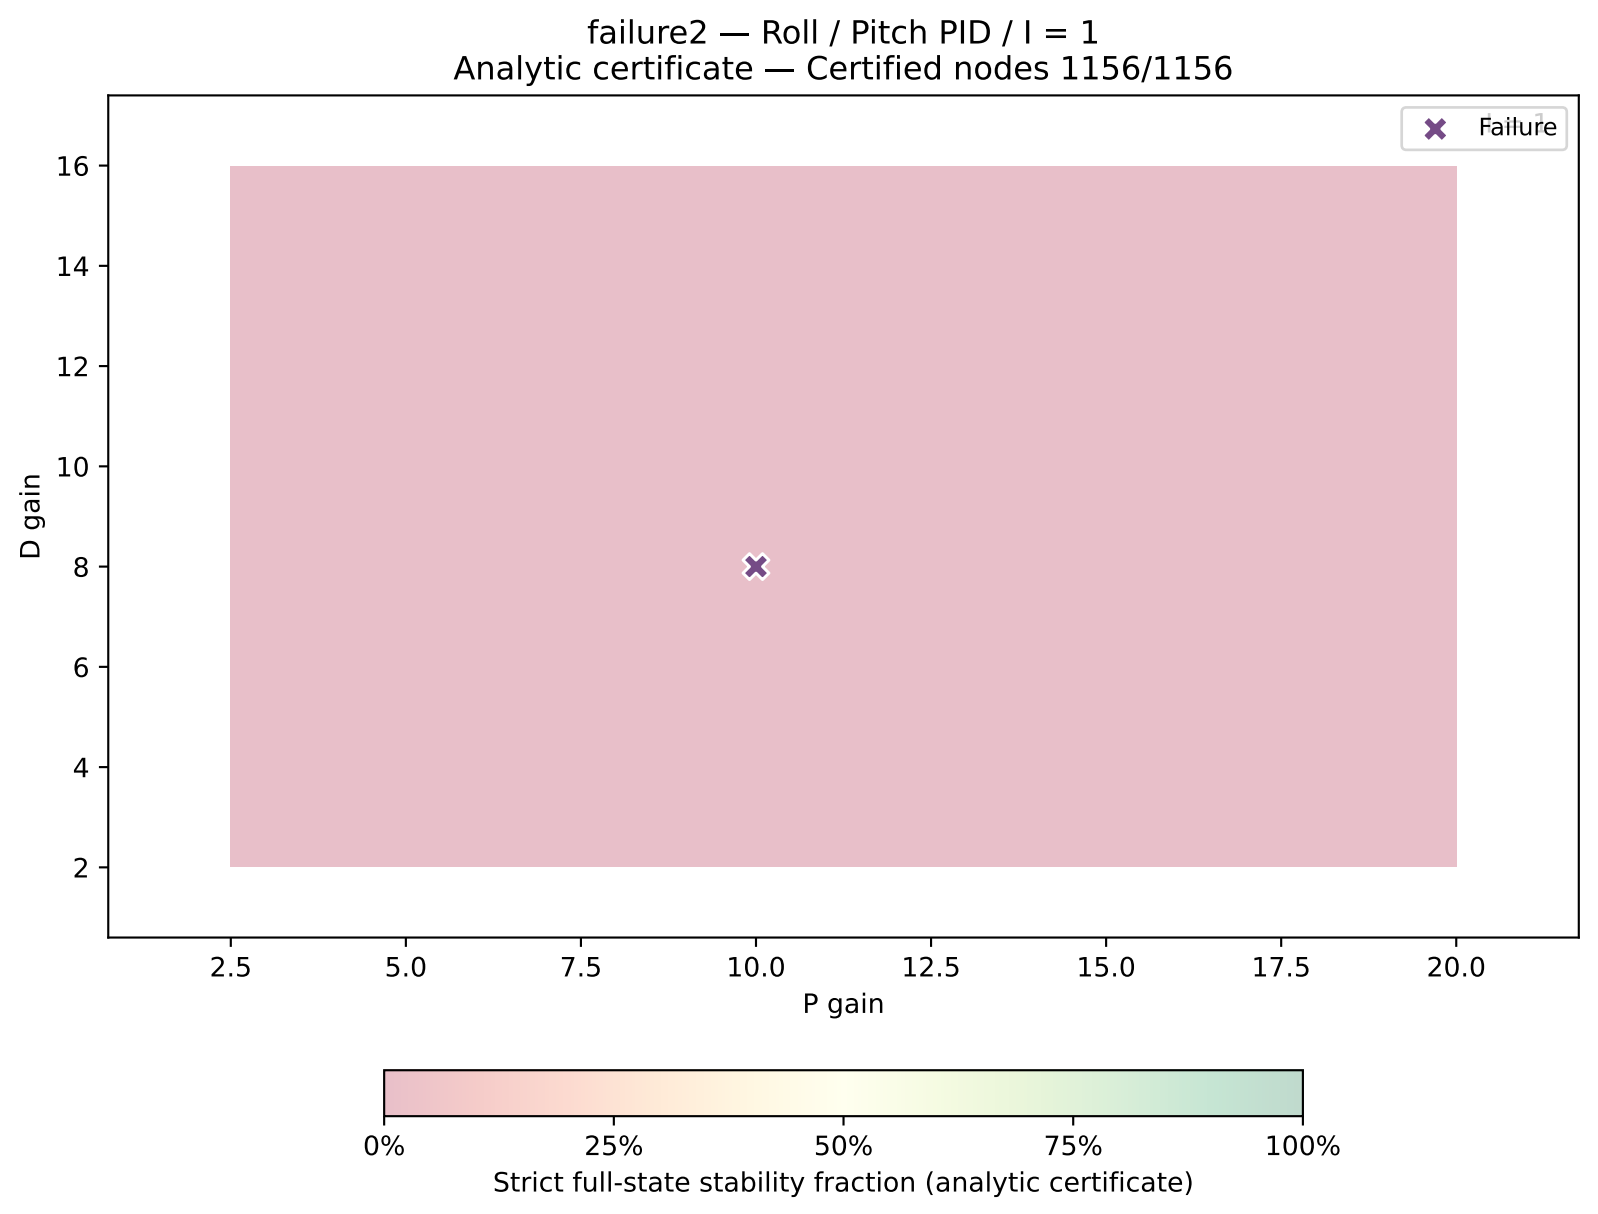

Analytical full-state stability assessment; no numerical poles were computed.
This is not a flight-failure probability. Pending nodes remain blank.
3D display cut at the recorded I; all computed data retained.

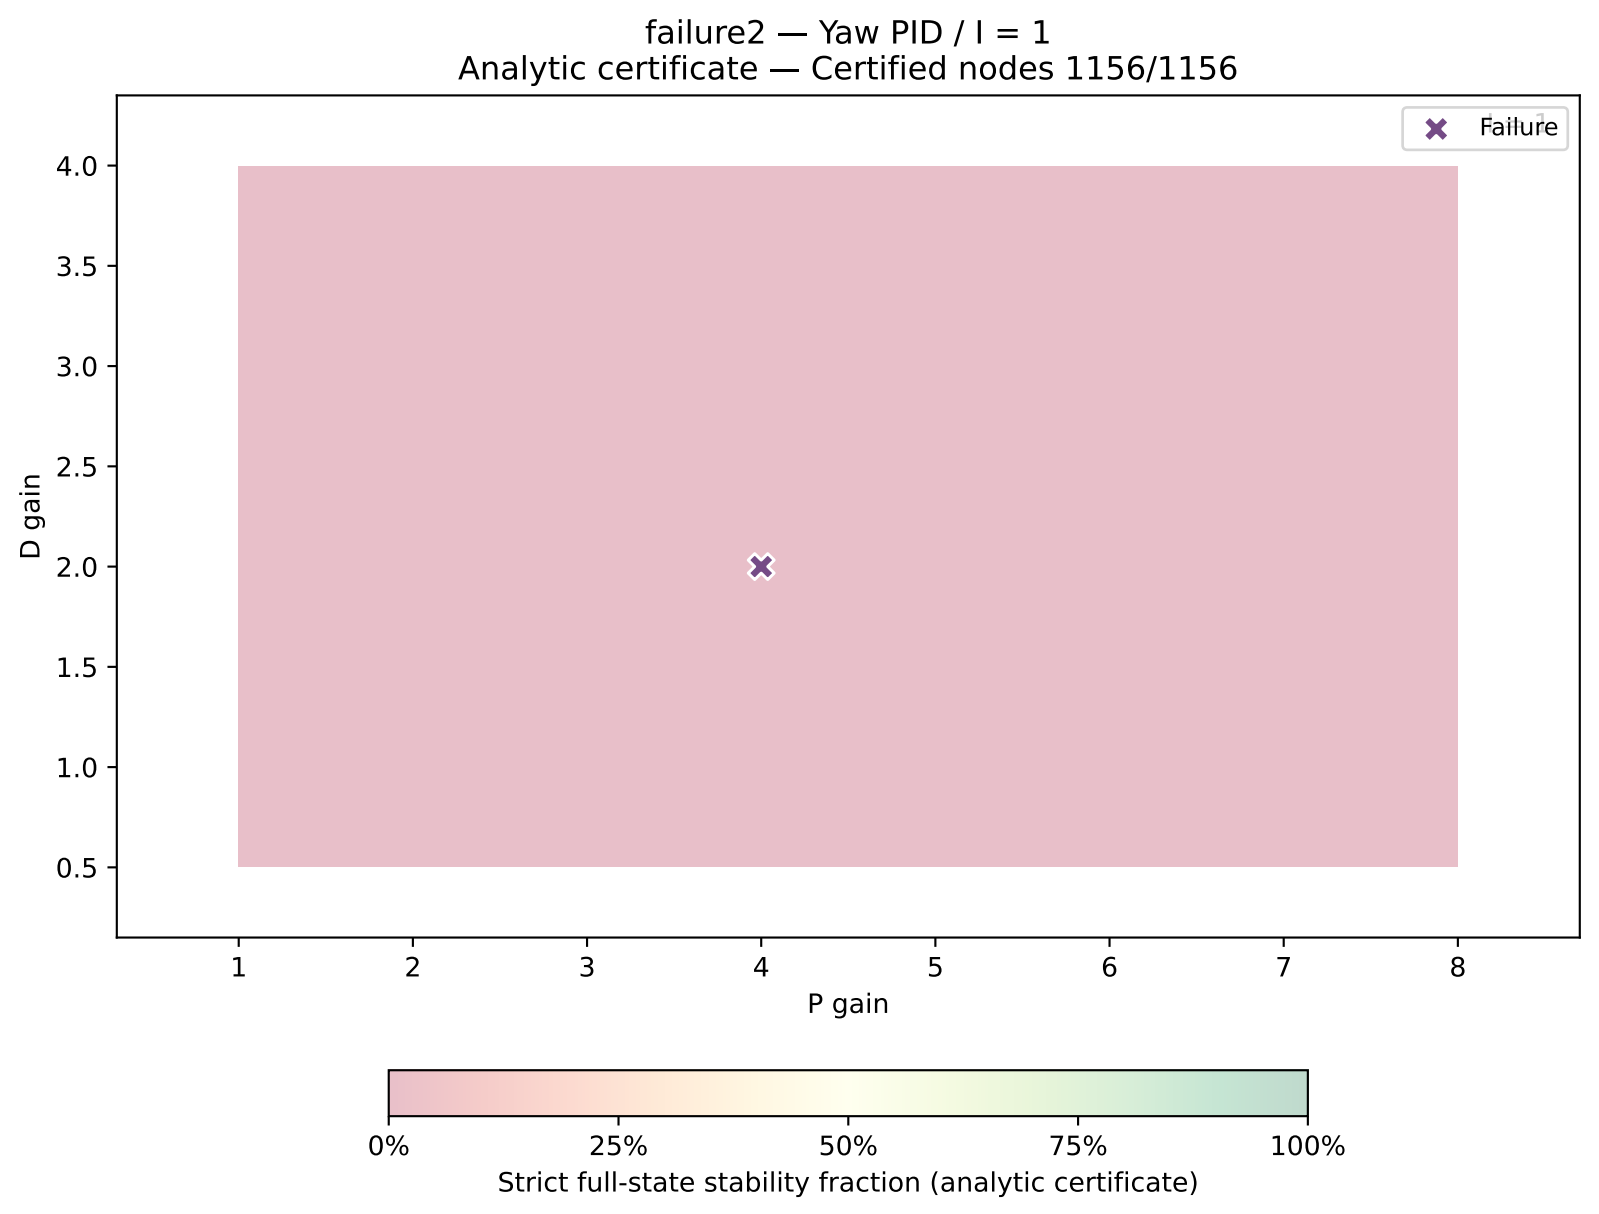

Analytical full-state stability assessment; no numerical poles were computed.
This is not a flight-failure probability. Pending nodes remain blank.
Recorded I=0.1 is off this plane; its marker is not projected.

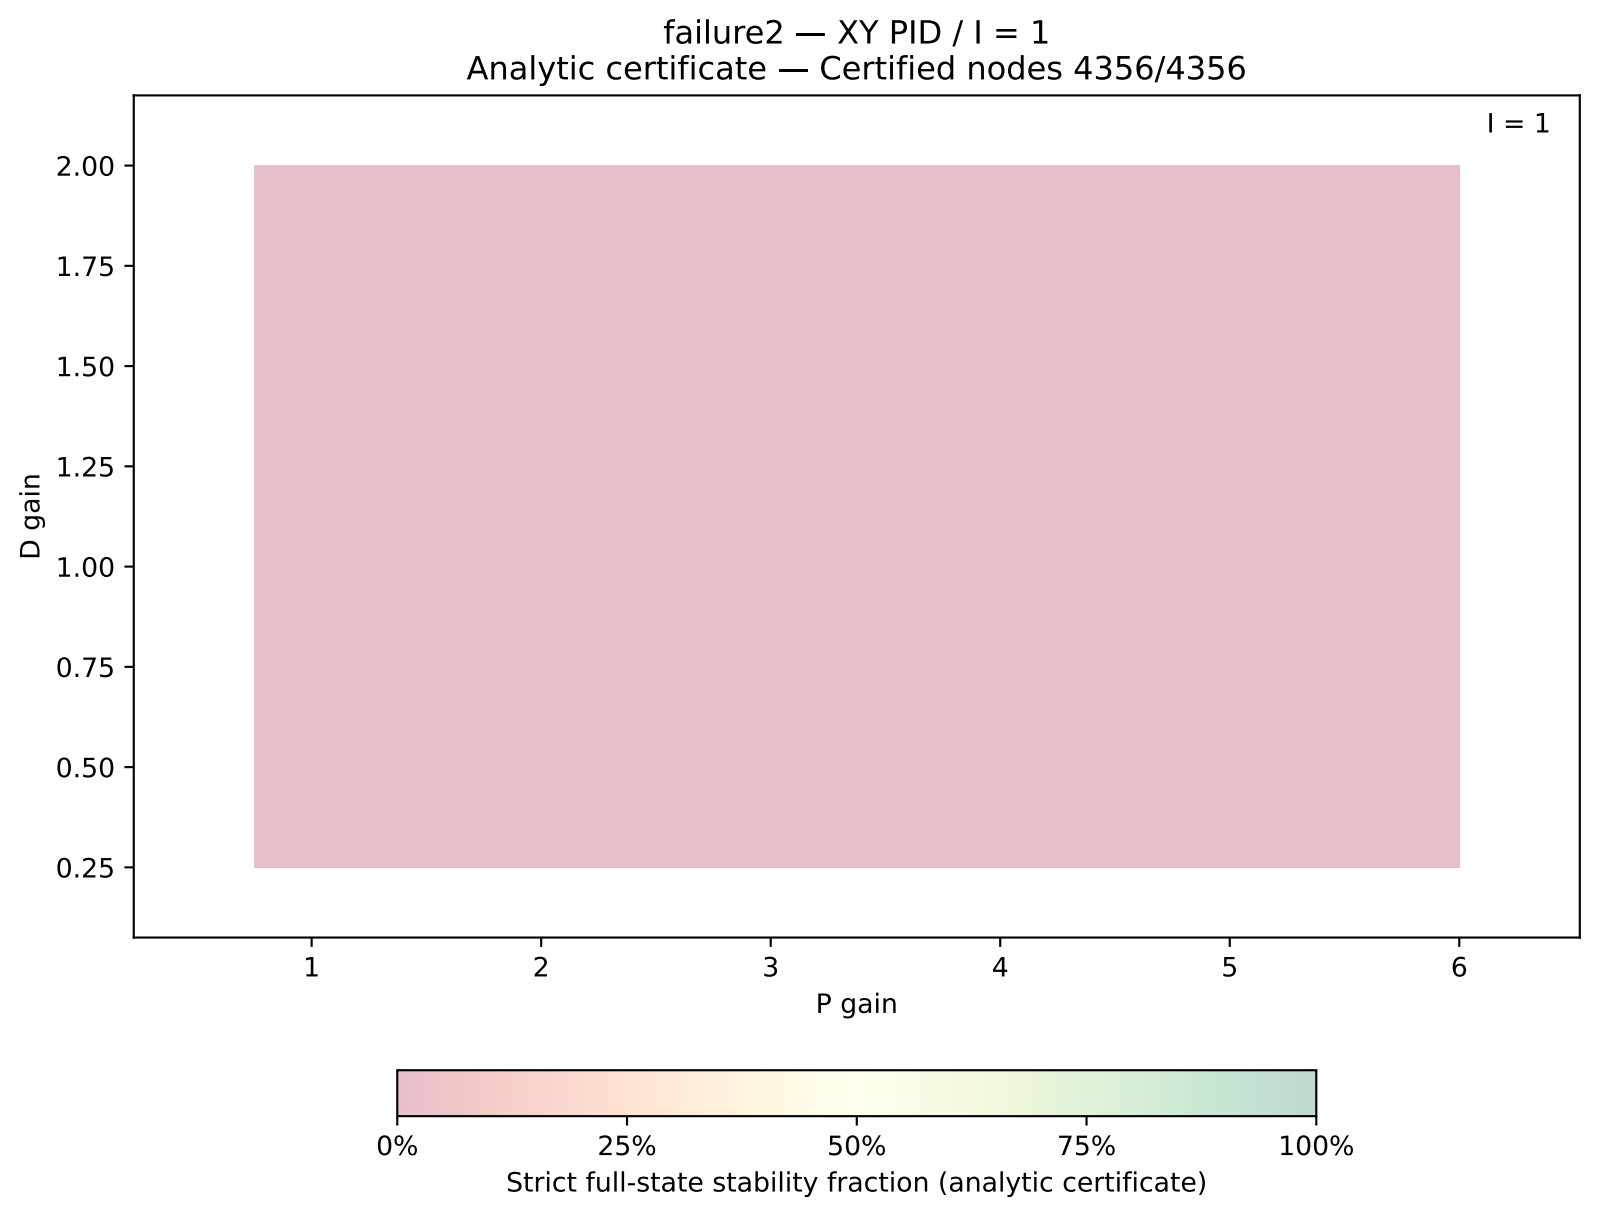

Analytical full-state stability assessment; no numerical poles were computed.
This is not a flight-failure probability. Pending nodes remain blank.

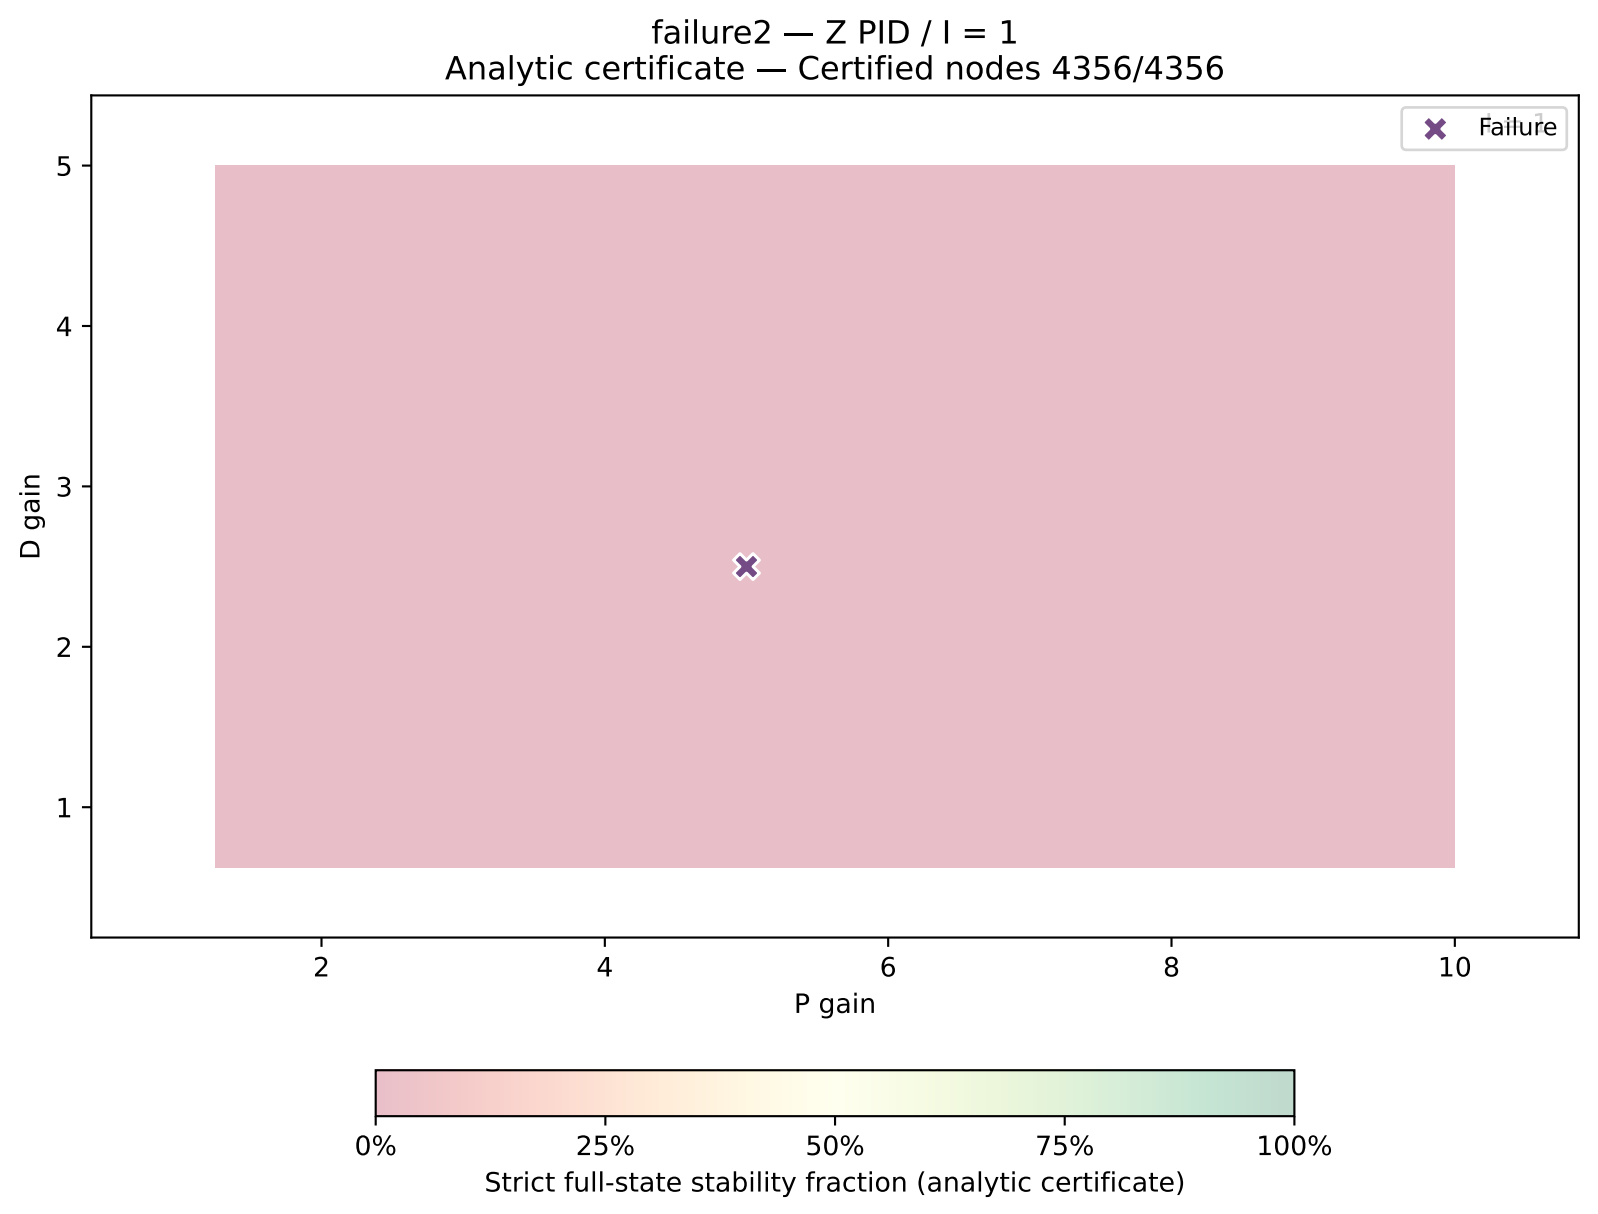

Analytical full-state stability assessment; no numerical poles were computed.
This is not a flight-failure probability. Pending nodes remain blank.

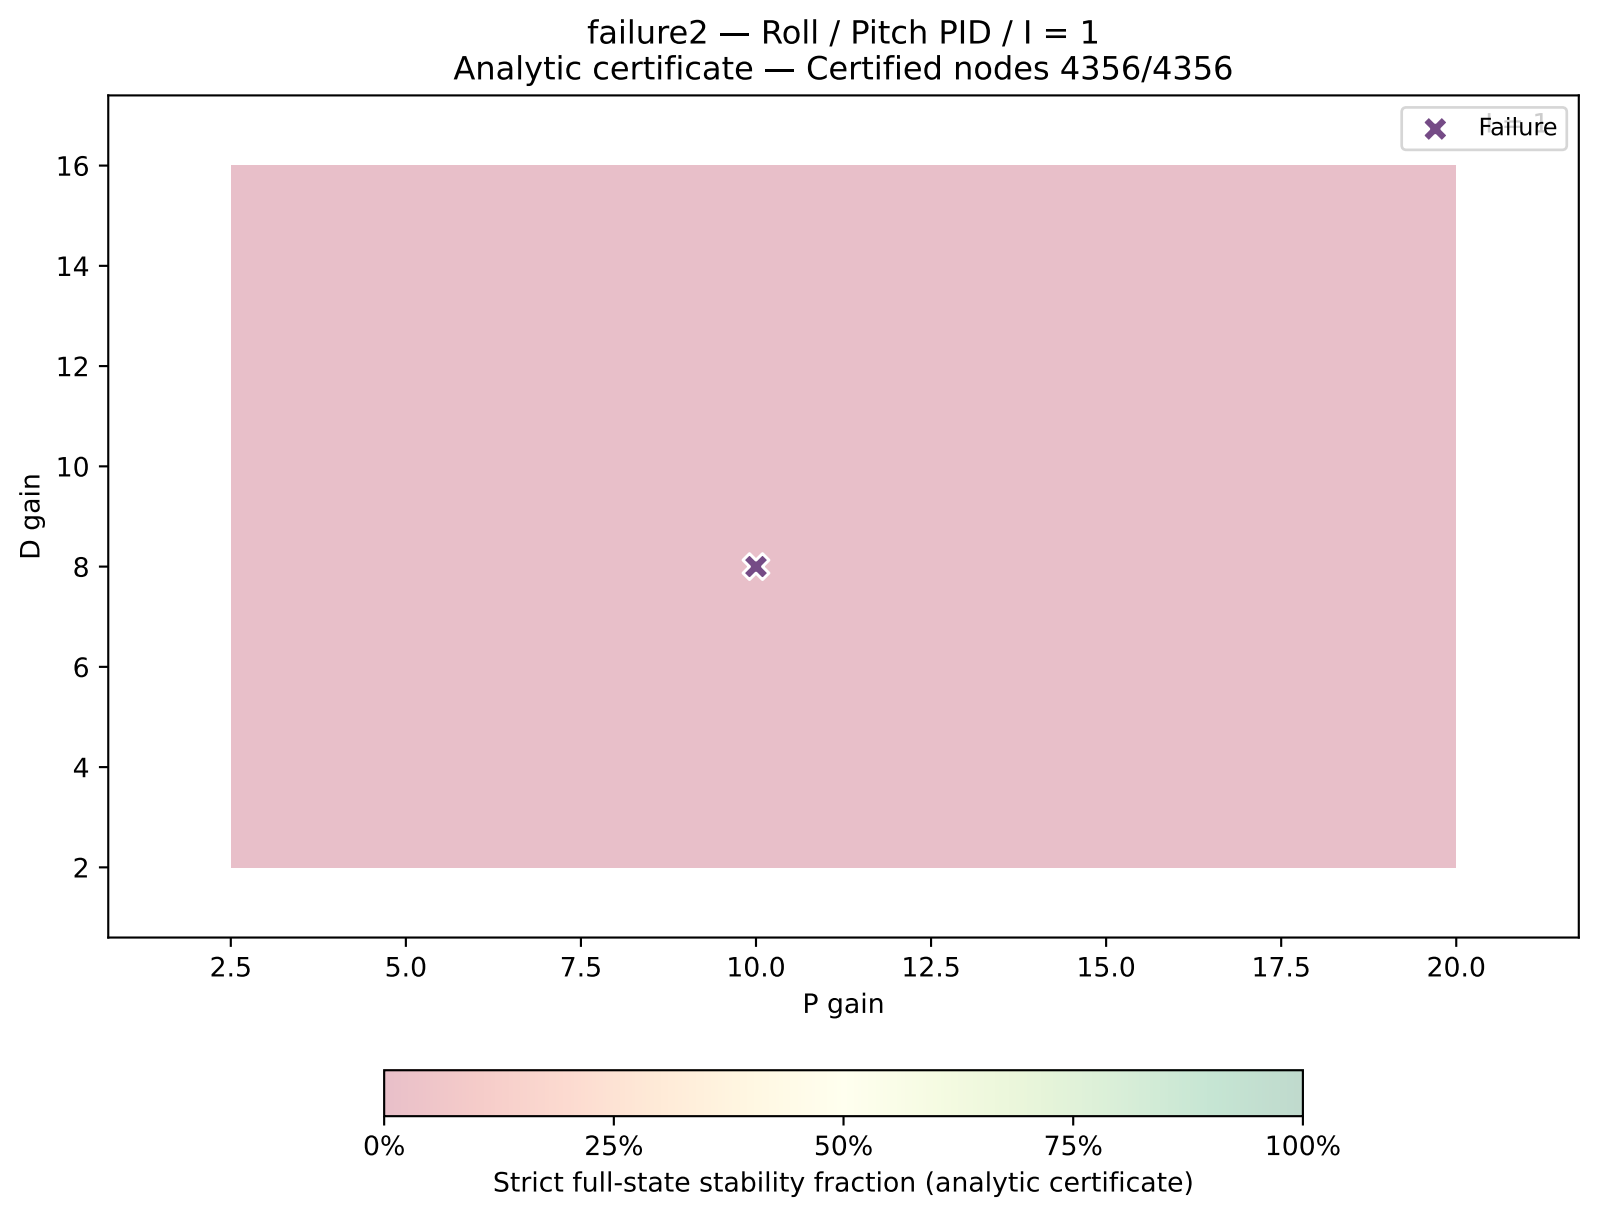

Analytical full-state stability assessment; no numerical poles were computed.
This is not a flight-failure probability. Pending nodes remain blank.

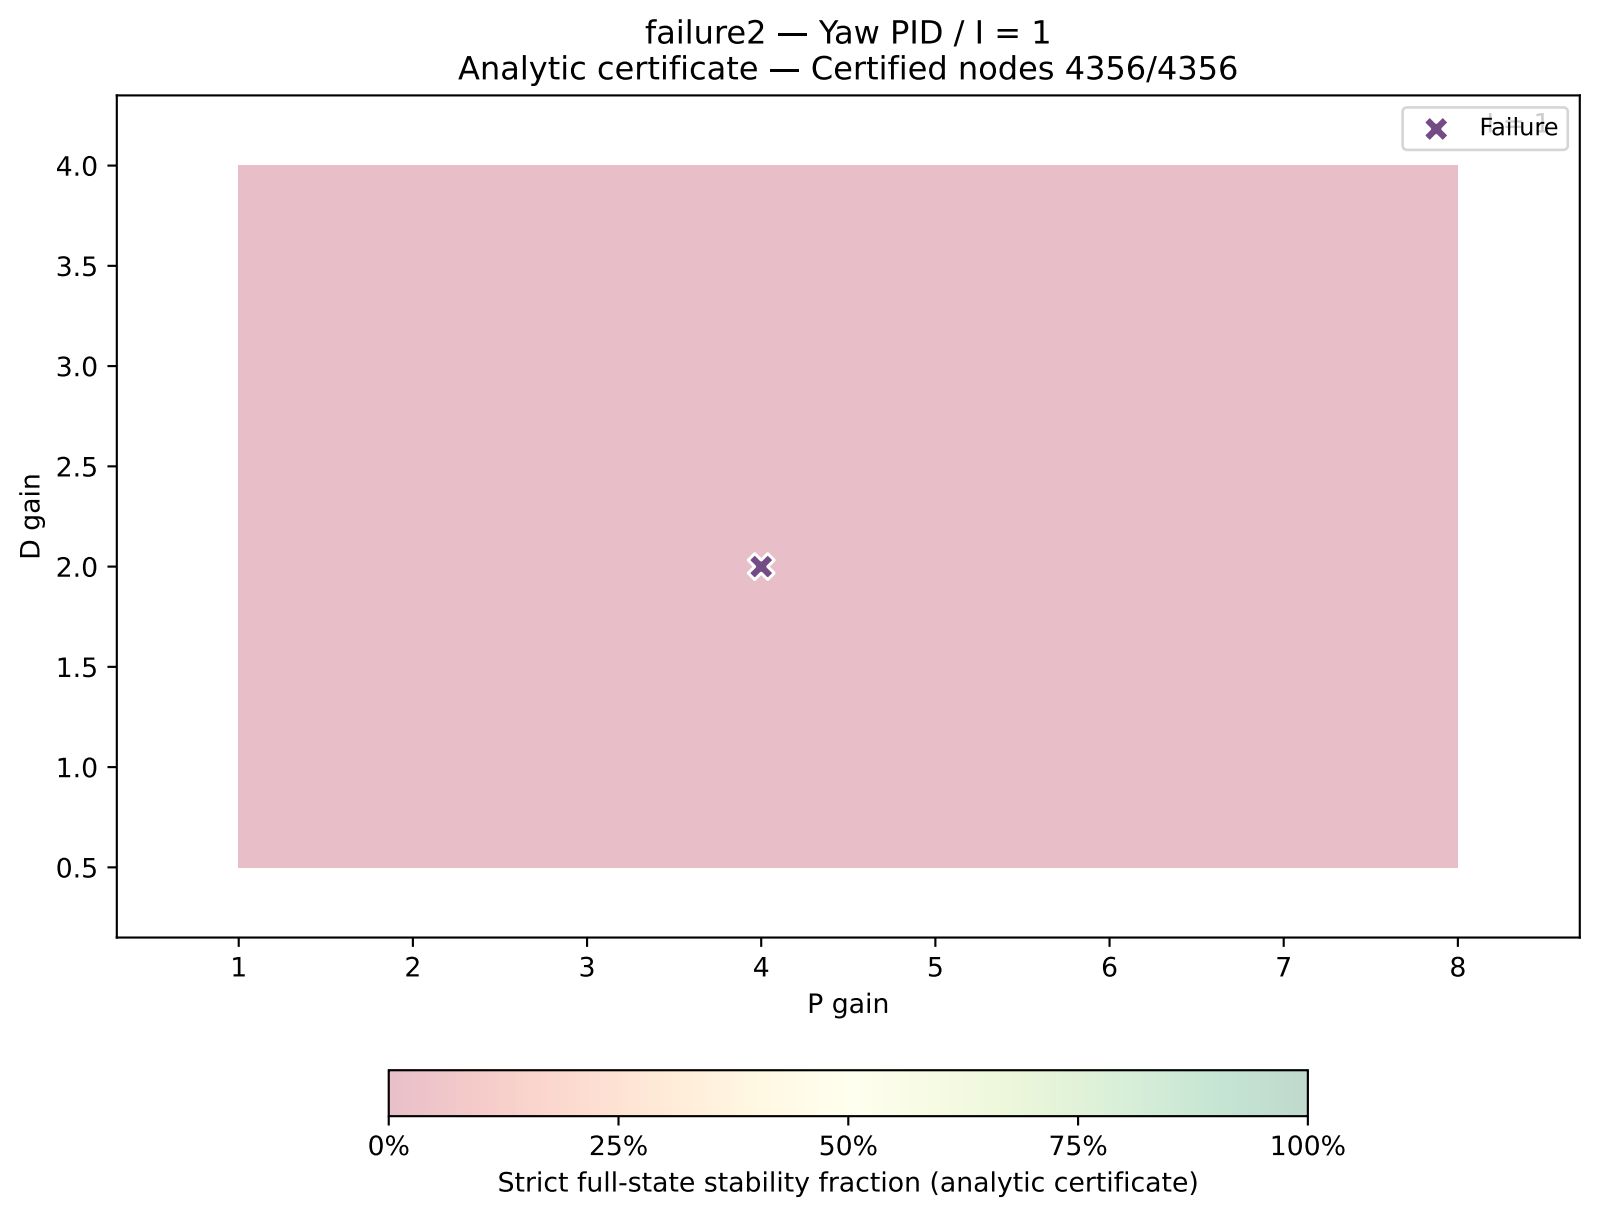

Analytical full-state stability assessment; no numerical poles were computed.
This is not a flight-failure probability. Pending nodes remain blank.
Recorded I=0.1 is off this plane; its marker is not projected.

Analytical full-state stability assessment; no numerical poles were computed.
This is not a flight-failure probability. Pending nodes remain blank.

Analytical full-state stability assessment; no numerical poles were computed.
This is not a flight-failure probability. Pending nodes remain blank.

Analytical full-state stability assessment; no numerical poles were computed.
This is not a flight-failure probability. Pending nodes remain blank.
